New Version

" Parallel Tape Drives now supported in BackMaster for OS/2! "

June 20, 1994 - MSR Development announces the latest version of BackMaster for OS/2. Version 1.1 of BackMaster will ship in late July at an MSRP of $ 79.95. This new version will add support for several parallel port connected tape drives as well as additional performance enhancements.

MSR Development has added support for the popular MicroSolutions BackPack parallel connected tape drive. Parallel drives from IOMEGA, CONNER, TECMAR, and CORE will also be supported by BackMaster 1.1. Colorado Trakker support is under development and expected by fourth quarter of this year.

Other new user benefits include:

- reduced time for tape operations by up to 60 % with support for **high speed tape adapters**;
- allowing users to create custom file selections and save them for future automated backups with **file save sets**;
- instant startup of the custom backup routine using simple **drag and drop**;
- automated operation and backup of multiple drives using **command line options**;
- bi-directional data exchange between DOS, WINDOWS, and OS/2 using **industry standard tape formats**;
- assured data integrity of the entire backup volume through **automatic verification** after backup;
- simple configuration using standard **notebook controls**;
- fast location of backup volumes using the **tape directory function**;
- easy to read file listings with **file display sorting** and **multiple icon sizes**;
- enhanced file selection using **exclude file filters**;
- improved backup options with **differential backups;**
- enhanced file restore with **restore to alternate path**.

- more -

BackMaster 1.1 for OS/2 supports -

these popular QIC 40/80 floppy connected tape drives:

Archive XL series; Colorado JUMBO 120/250; Core Tape250; Conner TapeStore 250; Iomega Tape250; Mountain FileSafe 4000/8000/TD250; Summit SE120/250; and many other Generic QIC 40/80 as a 2nd floppy.

these popular QIC 40/80 parallel connected tape drives:

MicroSolution Backpack*; Conner Parallel 250; Iomega Parallel 250 Tape II; and the Tecmar Tape Port 250. * - serial numbers 148644995 and above are supported.

these popular high speed tape adapters:

Colorado FC-10/FC-20; Iomega Tape Accelerator; and most 2.88MB floppy controllers.

BackMaster for OS/2 includes backup, restore, and disaster recovery utilities; free technical support via telephone (409-564-1862), fax (409-560-5868), BBS (409-560-5970), and coming soon, CompuServe's OS/2 BVEN Forum. Registered users of BackMaster may upgrade their program and documentation to the new version for $ 9.95. An upgrade file will be available on the MSR BBS to upgrade the program to version 1.1 at no charge.
