# Chapter 1

## ProPass

### 1.1 ProPass 1.00

Hi. This is my first ever contribution into the world of Amiga PD. I have started ↵  
with  
a simple password program.

ProPass v1.00 -© Duncan Scorgie 1997

Oh, well. Here goes!

Eh?	What is it, then?
Who?	Who made it?
Why?	Why was it made?
What?	What do I need?
How much?	Should I register?
Install?	I have a hard drive!

My Amiga	My setup
----------	----------

ProPass: Total security throughout your system.

Support Shareware. Support the Amiga.

### 1.2 ProPass 1.00

This is a cheesy program written on BlitzBasic2 by a 12 year-old. And I amn't even spotty!

It started off when my mates got into my computer and deleted some files.:-(

I ordered Blitz as soon as v2.1 was released, and on the same night programmed a ↵  
simple

---

password program that even my goldfish could probably get through. That night ↵  
Blitz  
Pass was born.

BlitzPass History:- v1.00- Easy  
v1.1 - No way through  
v1.3 - Little circles in the window.  
  
v2.011- Had a simple Sysinfo program. Twin-password ↵  
system

ProPass was born after Blitz Pass became redundant. I programmed it tonight ↵  
actually.  
:-)) (24/1/97 for all the sad gits who are still reading)

ProPass has a nice background and works on ALL Amigas.

Over and out.        /-----\  
                     - -  
                     \ (o) (o) /  
                     - -

                     \\_\_\_\_\_/

### 1.3 ProPass 1.00

Everything in the ProPass files are entirely my own work.

Duncan Scorgie 1997

With Special Thanks to:

Acid for Blitz  
Electronic Arts for Dpaint  
Guns 'n' Roses for the music  
Jay Miner for developing the best thing ever :-X

### 1.4 ProPass 1.00

The reason I programmed this is actually in Eh?

### 1.5 ProPass 1.00

For ProPass, you will need this:  
A hard disk  
An Amiga  
A floppy drive  
A processor

---

```
Power supply
Very little RAM:
A ROM chip
A keyboard
A brain
The PassWord "Mavis"
A memory (as in,in the brain)
```

On the password, make sure you use the upper and lower cases correctly.

## 1.6 ProPass 1.00

Register Now!

For a measly sum of £10 you get:

```
Reductions on all future releases
Definable Passwords
The next version i.e. v2.00 NOT 1.3 or the like for £7 ←
.50
Your name built in to the coding.
```

So, send me your £10 now, and be as happy as can be.

```
Duncan Scorgie
8A South Headlands Crescent,
Newtonhill,
Nr. Stonehaven,
Aberdeenshire,
AB39 3TT
SCOTLAND
```

Send your name,address,telephone no. and a £10 cheque to the above address.

AGA version available with:

```
Hi-res Screen
```

In fact, an unregistered version comes on this disk, and it also comes on the registered floppy.

PSST! £9 plus a blank disk can also be a method of payment.

## 1.7 ProPass 1.00

To install, copy the files:

```
LORES
=====
ProPass_Unreg
BG.iff

HIRES
=====
ProPass_Unreg_Hires
BGhi.iff
```

```

        :into the SYS: directory.
    BOTH
    ====
    XEN.FONT
    XEN
        :into Fonts:

```

Load your startup-sequence up and type

```

    "SYS:ProPass_Unreg" (or ProPass_Unreg_Hires, depending on which
    version you installed)
    on a new line BEFORE THE LOADWB COMMAND.

```

How to edit your startup-sequence

## 1.8 ProPass 1.00

Hello. I am brilliant, amn't I? Actually, don't answer that.

## 1.9 ProPass 1.00

To edit your startup-sequence, go to the shell prompt and type:

```
"Ed S:Startup-sequence"
```

## 1.10 ProPass 1.00

It started off as a standard A1200. Slowly over time it mutated into an "Ace Amiga ↔".

Specs: \0-0/ Ha-ha very funny.

```

    68030 processor
    10 Mb Ram
    FPU
    CD-rom drive
    External disk Drive
    Deskjet Printer
    62Mb hard drive

```

Upgrade, or kill the Amiga!

## 1.11 ProPass 1.00

Please print or neatly copy this form out and send it to me.
