Martyn's

1.1   main

```
                   Martyn's Icons ver 1.0 ReadMe.
                   ------------------------------

              Thanks loads for looking at this!

                        Introduction.
                        READ THIS BIT!!!
                        What you get.
                        What do I need?
                        Installation.
                        History.
                        What's next?
                        Thanks.

                 The AMIGA - Support it... Or loose it.
```

If you register this lot then you will receive all the brushes I've done.
Oh I'm sure you could take them directly from the icons themselves, but
you wont end up with a neat well presented pack without a few hours work!

Registration is mainly free but I consider this collection "SWAP-WARE" I.e.
if you have done anything then send me a copy/demo of it for registration.

If you want to register then just send me a letter (of encouragement), a
disk for your brushes + 50p for P+P and any free/share-ware you wish to
donate, to;

MARTYN BAMPTON.

3 Bishopdale Drive,
 Rainhill,
  Prescot,
   MERSEYSIDE.
    L35-4QQ.

Tel. 0151-430-0409

NET/e-mail: Someone put this on the AMINET as I have no connection - TA.

1.2   intro

INTRODUCTION.

Hi, this is release 1.0 of my icon "collection" yeah OK there aren't many
but I'm going to be using my Amiga for many years to come so there should
be loads more on the way!

COPYRIGHT.

Well all of the icons are mine and remain mine. You can use them and alter
them for your own use ONLY, if you pass this collection on then pass it on
in it's ORIGINAL FORM.

You may alter and use my icons for your own collections but please state in
your ReadMe files and icon tooltypes that I was in part responsible for the
icon by way of template, brush or other base graphic used.

PLEASE KEEP ALL TOOLTYPE INFORMATION INTACT AND DO NOT ALTER IT IN ANY WAY
IF YOU INTEND TO PASS MY ARCHIVE ON.

The "<M> brush" is not to be used by anyone except me since I created it to
identify my work.

ALL CONTENTS OF THIS COLLECTION (MARTYN'S ICONS 1.0) ARE COPYRIGHT BY MARTYN
BAMPTON 1995 TO 1997.

MAGIC WORKBENCH IS COPYRIGHT BY MARTIN HUTTENLOHER 1994. (I think)

1.3   read

WARNING!!!

The installation script is a bit crude, I've tested it and it does work but
will only definitely install my system icons since these are standard. It will
see if you have any other "semi-standard" icons (like DPaint) and replace those
also.

IT WILL OVERWRITE EXISTING ICONS!!! So make sure you have backed-up any ones
you want to keep.

Don't worry your Amiga will not go super nova. I take no responsibility if it
does etc...

1.4   contents

ICONS.
All the icons are my own hard work, I enjoy creating icons and tend to make
around 8 "good" ones a month (well I am at collage.) I use 640x480 MULTISCAN
PRODUCTIVITY on my A4000 and so most of the icons are drawn to look good at
this resolution. I also have an A1200 using 640x256 – some of these icons
don't look to good at this resolution so get a multisync monitor!

I'll try to do a 640x256 collection if I get any requests.

TEMPLATES.
These are the blank base icons I used to do most of the collection, some are
my own design others, like the drawer, are MagicWB standard issue.

BRUSHES.
I have created many brushes myself and taken brushes form existing icons – I
take no credit for such brushes! If you register you will get all the brushes
for your own usage.

THERE IS ONE BRUSH WHICH I WOULD LIKE KEPT SACRED – MY ERR "<M>" THINGY –
I WANT TO KEEP IT TO IDENTIFY MY STUFF SO THERE!!!

TELL ME ABOUT IT!
These icons and templates are free, BUT... I want your opinion so if you can
find time to ring or write then do so.

1.5   requirements

SYSTEM REQUIREMENTS.

An OS 2+ AMIGA with an 8+ colour palette and preferably MagicWB.

1.6   installation

INSTALLATION.

Use the provided script or do it manually with SWAZINFO, ICON EDIT or similar.

The script will replace standard system icons mainly, but if you have a few

other drawers like "Data" then these will also be replaced. The script offers
plenty of chances to abort the installation so you should be alright if you start
it and change your mind.

1.7 history

HISTORY.

* JAN '95 Started to get "good" at icons.

* NOV '96 sent my 1st few icons to AF for their CD.

* JAN '97 1st proper release.

1.8 future

FUTURE.

* More GREAT icons ;-)

* An improved installation script.

1.9 thanks

THANKS TO.

* Martin Huttenloher for MWB

* Amiga Format and CU Amiga for cover CD mags (Amiga Computing and AUI take note ←
  !)

* All the free/Share-ware authors out there!
