Chapter 1

SysLockPrefs

1.1   main

```
                          SysLockPrefs V1.0
                       Released by Kai Software
                       Written by -Gonzo- of Kai

                              Introduction

                                 Usage

                        Copyright and Disclaimer

                          Thanks and Greets

Sorry about the poor layout, but I'm in a hurry to get some docs
finished, I'll polish it by the next version 8)

-Gonzo- of Kai
```

1.2   intro

```
These are some short docs for use of SysLockPrefs.

SysLockPrefs, isn't actually (as the name suggests) a preference
program, this was the orignal idea, but, well, er, umm, ok, I'll admit
it, I COULDN'T BE BOTHERED FINISHING IT! (Happy now?)

Instead, I just used the code making parts of the code, and used just
these, (this was because it was NEEDED for SysLock)
```

Along the way I have added a few little bits:

Code protection - to stop just anyone adding a code
About Page - Just because (no reason)
Help Page - Badly set out, but what the hell
A small face - I just felt like it (click him)

I will go into details in the Usage

Whats it for?
Oh, almost forgot about that.

SysLockPrefs, is a program used to create codes for SysLock, without
SysLock, its useless, if you have it, read on!

1.3 usage

SysLockPrefs is REALLY easy to use!

When its is started, a (nice!) GUI is opened with the following:

A Window (duh!)
11 buttons in a keypad arrangement, these are:

0-9 and and ENT key.

You will also see (disabled until correct password is put in)
Two string gadgets, NAME and CODE
A Save button
A Quit button
A Help button
An About button

A small face in the lower right corner.

I'll now explain the uses

The keypad is used to input the 5 digit code (Read on) I have given you
when the correct 5 numbers are entered (and the ENT key is pressed)
the keypad will become disabled (to stop you playing with it)
and the 2 string gadgets will become clear.
In the one marked NAME, enter the new user name
In the one marked CODE, enter the new user code

When you have entered something into them, the save button will also
become enabled, you can now save this name and code to the file called
SysLock.dat is created, which has the encrypted names and
codes saved to it, without it the program ends.

The Help button is badly set out (it was done in a hurry), but click
on it for some help

The About button gives some basic info

The Quit button does something, but I cant remember what, give it a go!

And finally the face

The face doesn't actually DO anything, but I put it in anyway, just for
the hell of it (I may put one in each program I make)

Click on the face and it pulls a face
The face can be turned off by the file being removed!

Oops almost forgot

The keypad reads a 5 digit code from the file mentioned in the tooltypes
under KEY, if the tooltype is missing, it will use S:SysLockPrefs.Key
This is not changable, and the password should be supplied, if it hasn't,
well, to put it bluntly, your buggered!

And....
The face is on a file called (by default) Data/Face1.shanim
It is a 2 frame anim brush of 4 colours.... You can make a replacement
with Dpaint, just make sure its the right size.

Or you can make a new one, with a different name, and alter the tooltype
of FACENAME to suit your file 8)

Also
I have now added 4 extra face.shanim files, and a template, these are
located in the same place as the orignal Face.shanim.
Load the template into Dpaint (or equivalent) and make two anim frames,
use the top pic (without the border) as the 1st frame, and the 2nd pic
as the 2nd frame, then pick these up as an animbrush and Save!

1.4 copyright&disclaimer

Standard disclaimer:

THERE IS NO WARRANTY FOR THIS PROGRAM TO THE EXTENT PERMITTED BY APPLICABLE
LAW. EXCEPT WHERE OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDER AND/OR
OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND,
EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED
WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE
ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU.
SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY
SERVICING, REPAIR OR CORRECTION.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL
ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY REDISTRIBUTE THE PROGRAM
AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL,
SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR
INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR
DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES
OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF
SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH
DAMAGES.

Or in other words, it is all YOUR fault, you hear!

By using this program, you accept all blame and damages.

Copyright

a. This software is copyrighted by its developer(s). That means that you are NOT ALLOWED to modify the program(s) and documentation in any way. Especially you MUST NOT REMOVE the documentation or this text file.

b. You are NOT allowed to use this software or any part of it for any other purpose than that one mentioned in its documentation, this also includes any fonts, images or samples. If the developer(s) did NOT include the source code of the program(s) in this package you are NOT allowed to de-compile any part of it.

1.5   thanx&greetz

Right, I suppose I'd better acknowledge everyone and his dog.

I think I'll start with the Thanks this time.

Synapse and everyone at Synergy
(For thanks to numerous to mention)

Eddy Carrol author for SnoopDos (It helps!)

Acid Software for Blitz Basic

Amiga Format - Excellent cover CD's (UFO Enemy Unknown - well done!)
and for still being there!

CU Amiga also for still being there!

Er, well theres no one else, in fact I did this program all on my own.
It was me ya' hear, it was all me (Fades to mad ramblings)

Ok then, the greets.

Greets to:

Syanpse (again? Ah well)

The rest at Synergy

Anyone else who feels they deserve a mention
(Write to me and ask for one - its a bit thin on the ground up to now)

I think I'll keep this section going

Curses, various voodoo hexes and general rare tropical diseases to:

The biggest curse and various voodoo hexes too : Bill Gates
(You @&$*!) - I saw that Flan attack on the Amiga Format CD (AFCD25)
And laughed for ages!! (so big of him not to have his security have the
attacker publically shot wasn't it 8)

Nope, thats it, no more curses and voodoo hexes this time around.

1.6 gonzo

Gonzo?

Its me!

Kevin Mckenna of Kai Software

Thats it!

Bye

Kevin -Gonzo- Mckenna
