## Chapter 1

# XDCC-Get v3.41 - The Best AmIRC XDCC GUI

### 1.1 XDCC-Get v3.41

AmIRC XDCC GUI - XDCC-Get v3.41

Originally Idea By:

IRC: Bossman^ Email: bosman@erols.com Web: www.erols.com/bosman/

Overhauled by:

IRC: lanky Email: sykoe@sub.net.au Web: www.sub.net.au/~sykoe/

[Main Contents](#)

### 1.2 XDCC-Get v3.41 - Contents

Contents:

A fast, well laid out, fully featured GUI for XDCC requesting.

Great for grabbing packs. For example.. Kuang<sup>11</sup> offers.

The perfect addition to Kuang Eleven v2.x, Enhanced with Kuang 11 v3.x or higher!

[Introduction](#) - Introduction to the philosophy

[Requirements](#) - What you need for this program to work

[Thanks](#) - People who help make XDCC-Get what it is today

[Installation & Usage](#) - Installation & Usage on your system (Options Have Changed!)

[Menu Over-View](#) - The Full Menu Over-View (Not Completed Yet)

[XDCC-Get FAQ](#) - XDCC-Get Frequently Asked Questions

[History](#) - The past problems and triumphs

[Future](#) - Ideas and improvements to come for XDCC-Get(?)

[Contact](#) - How and where to contact the author

[Legalities](#) - Protecting the innocent from the money making lawyers

[Index](#) - Index of this Amigaguide (For pre v39 users)

\* This whole project is in memory of the recently departed Seona. I'll miss you always.

## 1.3 XDCC-Get v3.41 - Introduction

Introduction:

Welcome to XDCC-Get. If you ever have requested files off XDCC Bots on IRC you know that they can be a pain. A lot of typing that is repeatative. Some people set Buttons and some people set F-Keys in AmIRC. There have been average attempts at scripts also, but alas nothing to make it a definately perfect solution.

The Answer?

I saw Bossman^'s XdccGetFile (v2.1) AmIRC script and instantly thought, it is good but lacks a million things that people do need. Mostly it was cumbersome to use due to not full and proper keyboard support. Also it didn't support /Msg XDCC support for Un\*x type XDCC Bots and lacked multiple pack requesting.

After being frustrated enough, I worked and fixed it for my own needs. Nearing what was v3.00beta I asked Bossman^ if I could release it publically. He agreed and the rest is [history](#).

This program is specifically made to work in conjunction with AmIRC. I found myself having too many buttons in AmIRC thus the original GUI by [Bossman^](#) I saw was a great idea. I also found that on occasions that some XDCC Bots only supported /Msg XDCC commands instead of the usual /CTCP XDCC commands. Thus extending the GUI was needed.

The program was made to make it easier to get XDCC Packs. More current versions has made this program even more powerful for people that want to go directly to certain parts inside the program (See [Usage](#)).

XDCC-Get was made to support the following:

- An easy to use GUI to request XDCC packs from.
- Has temporary DCC AutoGet for Kuang 11 v3.x or higher users.
- CTCP & Msg XDCC requests.
- Multiple CTCP/Msg XDCC requesting.
- Protection so only numeric packs will be requested.
- Anti-Flooding protection on Multi-requesting.
- Open a Query window to view the XDCC list in. (Optional)
- Start in any part of the program in CTCP or Msg format. (Even Listing)
- Clean output. (CTCP and Msg output are Clean)
- FULL mouse/keyboard support for every pack number.
- Optimised code.
- Jump to the author's Web Page.

NOTE: Some of the Options Changed, So read the [Usage](#) information.

```

## 1.4 XDCC-Get v3.41 - Requirements

Requirements:

What you need for this program to operate fully:

- AmIRC IRC Client (Available on AmiNET or [ftp.vapor.com](http://ftp.vapor.com) or alternatively <http://www.vapor.com>)
- RextxReqTools.library in Libs: (In This Pack, for the full pack goto AmiNET:utils/libs/ReqToolsUsr.lha)
- RextxSupport.library & RextxDosSupport.library in Libs: (From your Workbench disks)
- RextxMast Running (Needed for any ARexx script to work, and available from your Workbench disks)

## 1.5 XDCC-Get v3.41 - Thanks

Thanks goes to:

- \* Bossman^ for the great idea he started.
- \* KingGuppy for help on some program improvements and ARexx command help.
- \* Ariel (ARexx Messiah) for help on Kuang v3+ Temporary AutoGet and general ARexx command teachings.
- \* Term!nator, eNTHRONE^,etc for his cool ASCII logo(File\_ID.DiZ & see above),
- Beta testing sessions, Improvement ideas & support
- \* Cyber2th for Beta testing and locating the Query Window Bug. (How did I miss that?!)
- \* Dragster^ for being a great Beta tester & Multiple Pack Selection Idea)
- \* HeavyWeight for wording for Pack requests to the local user
- \* Zarovich for separate List Query Window with easy viewing Option..
- \* Anton Rolls for his help on some ARexx.
- \* This whole project is in memory of the recently departed Seona. I'll miss you always.

## 1.6 XDCC-Get v3.41 - Usage

Installation & Usage:

For Usage upon your system just copy the file XdccGet.amirx to your AmIRC/Rexx drawer and RexxReqTools.library to your Libs: Drawer.

Once you have done that, Start up AmIRC and then type the following:

```
/Alias XDCCGet /Rx XdccGet.amirx %p
```

Then Save your Settings under the Settings menu.

If you wish to have a button for XDCC-Get, then go to your Settings/Setup menu and add an Action button with a label of XDCCGet and a Operation of /XDCCGet %u

Some Options have changed since 3.25 public release. So Please read below.

Usage: /XDCCGet <Nick> [Option] , [C/M]

<Nick> is the person you wish to request XDCC Packs from and is always required.

[Option] can be a pack # you wish to request or:

LIST - XDCC List

INPUT - Pack input window

MANUAL - Manual pack input window (Changed since 3.25 Public)

LISTINPUT - XDCC List and also brings up the pack input window

LISTMANUAL - XDCC List and also brings up the manual pack input window. (Changed Since 3.25 Public)

, [C/M] where C is CTCP requests/GUI and M is Msg requests/GUI. (Always prefix C or M with a , )

XDCC-Get has a few extra options that allow the user to directly go to a certain part of XDCC-Get, they are:

/XDCCGet <Nick> <Pack> , [C/M] - Request CTCP XDCC Pack # (No Need to type #) on person <Nick>

/XDCCGet <Nick> **List**, [C/M] - Do a CTCP XDCC List on the person <Nick>

/XDCCGet <Nick> **Input**, [C/M] - Open a CTCP Pack Input Window on the person <Nick>

/XDCCGet <Nick> **ListInput**, [C/M] - Do a CTCP XDCC List and open a CTCP Pack Input Window on the person <Nick>

/XDCCGet <Nick> **Manual**, [C/M] - Open a CTCP Multi Pack Input Window on the person <Nick>

/XDCCGet <Nick> **ListManual**, [C/M] - Do a CTCP XDCC List and open a CTCP Multi Pack Input Window on the person <Nick>

/XDCCGet <nick> [OPTION] , [C/M] - Where [C/M] is C = CTCP and M = Msg requesting

For buttons use, replace <nick> with %u

If you wish the program to open up a Separate Query for the list offered to be viewed in, then you have to edit the ARexx script and change QUERY="NO" to QUERY="YES"

## 1.7 XDCC-Get v3.41 - To Do

To Do:

Don't Expect this to be perfectly optimised nor perfect.. I am still learning everyday.

- An API application. I require the API headers/information to do such a thing. (I Don't See A Reason For An API In This Case)
- A MUI(Rexx) application. The MUIRexx's author logic circuits are messed up!
- Move this Amiaguide documentation to HTML format. (Suggested by Bossman^)
- A Shutdown of Miami automatically once all selected files have been downloaded. (Dragster^)
- More Kuang11 v3.0 connectivity for extra "special" options. (Dragster's and alike)
- Any ideas you suggest.

Any more ideas please **Contact** myself.

## 1.8 XDCC-Get v3.41 - Full Menu Over-View - CTCP Menu

Full Menus Over-View - CTCP Menu:

This section is a Overview of the GUI, explaining how it works what each button does, with links where each button is.

I hope this solves some people's problems and fears with this program.

+-----++

|XDCC-Get v3.41 by lanky - CTCP Menu |@|

+-----++

| Choose your CTCP XDCC Request from XDCC |

||

| O - Requests a list and opens the Pack GUI |

| L - Requests a list and Quits |

| P - Goes to pack input menu |

| M - Go to XDCC-Get Msg menu |

| A - Brings up the Author's information |

+-----+

| **List & Open Pack GUI List & Quit Pack Msg About Quit** |

+-----+

**List & Open Pack GUI** - Gets a CTCP XDCC List of all the packs on offer from the person the GUI is activated on.

**List & Quit** - Does a CTCP XDCC List from the person the GUI is activated on and then Quits the GUI

**Pack** - Goto to the Pack Input Menu to select which pack(file) to download from the person the GUI is activated on.

**Msg** - Goes to Msg format for XDCC requesting (Used by some Unix XDCC Bots and some Mac ones)

**About** - Takes you to the About Menu.

Gives general information about the Program/Author.

With buttons to open up YAM to email the Author or

open up his Web Page on IBrowse, AWeb or Voyager.

**Quit** - Quits the XDCC-Get GUI and program totally.

## 1.9 XDCC-Get v3.41 - Full Menu Over-View - Msg Menu

Full Menus Over-View - Msg Menu:

This section is a Oview of the GUI, explaining how it works what each buttomns does, with links where each button is.

I hope this solves some people's problems and fears with this program.

+-----+--+

|XDCC-Get v3.41 by lanky - Msg Menu |@|

+-----+--+

| Choose your Msg XDCC Request from XDCC |

| |

| O - Requests a list and opens the Pack GUI |

| L - Requests a list and Quits |

| P - Goes to pack input menu |

| M - Go to XDCC-Get Msg menu |

| A - Brings up the Author's information |

+-----+--+

| **List & Open Pack GUI** **List & Quit Pack CTCP** **About** **Quit** |

+-----+--+

**List & Open Pack GUI** - Gets a Msg XDCC List of all the packs on offer from the person the GUI is activated on.

**List & Quit** - Does a Msg XDCC List from the person the GUI is activated on and then Quits the GUI

**Pack** - Goto to the Pack Input Menu to select which pack(file) to download from the person the GUI is activated on.

**CTCP** - Goes to CTCP format for XDCC requesting (Used by most XDCC Bots)

**About** - Takes you to the About Menu.

Gives general information about the Program/Author.

With buttons to open up YAM to email the Author or

open up his Web Page on IBrowse, AWeb or Voyager.

**Quit** - Quits the XDCC-Get GUI and program totally.

## 1.10 XDCC-Get v3.41 - Full Menu Over-View - List & Open Pack GUI

Full Menus Over-View - List & Open Pack GUI:

This will get a XDCC List off the person you set XDCC-Get to work on.

If it responds nothing this may be due to your lag or the other persons lag.

If ya have waited for some time and you get no response, try to ping the person (/ping <nick>) if that takes a lot of time to get back or doesnt ever, the person has crashed or one of you two is lagged badly.

If the Ping replies, then try XDCC-Get with the other format, Example: Try Msg Format or CTCP Format.. the different one to what you tried previously.

( Msg or CTCP Menu of XDCC-Get )

( /XDCCGet <nick> List ,m or /XDCCGet <nick> List ,c )

\*Note: Lag/Lagged means the time to send a message to someone is long and slow, similar to jet la, as you feel tired/larthargic.

After it sends out the List to the person, it will open this GUI:

Please note the numbers below can be any variable group of 10 ascending numbers..

```
+-----+
|XDCC-Get v3.41 by lanky - Pack Input Request Menu |@|
+-----+
| Pick the XDCC pack number to request from XDCC |
| M for Manual to input more easily multiple packs |
| N or Return will choose Next |
+-----+
```

```
|11 12 13 13 14 15 16 17 18 19 20 Next Manual Prev Quit|
+-----+
```

```
+-----+
```

| Pick the XDCC pack number to request from XDCC |

| M for Manual to input more easily multiple packs |

| N or Return will choose Next |

```
+-----+
```

```
|11 12 13 13 14 15 16 17 18 19 20 Next Manual Prev Quit|
+-----+
```

```
+-----+
```

**11 to 20** - Request the pack number from the person the GUI is activated on.

**Next** - Moves the menus buttons to the Next 10 packs.

**Manual** - Takes you to the Manual Input Menu (Enter [Multiple] Packs via the keyboard

**Prev** (Appears when over 10) - Moves the menus buttons to the Previous 10 Packs (If Available).

**Quit** - Quits the XDCC-Get GUI and program totally.

## 1.11 XDCC-Get v3.41 - Full Menu Over-View - Pack Input Menu

Full Menus Over-View - Pack Input Menu:

Please note the numbers below can be any variable group of 10 ascending numbers..

```
+-----+
|XDCC-Get v3.41 by lanky - Pack Input Request Menu |@|
+-----+
| Pick the XDCC pack number to request from XDCC |
| M for Manual to input easily multiple packs |
| N or Return will choose Next |
+-----+
```

```
|XDCC-Get v3.41 by lanky - Pack Input Request Menu |@|
+-----+
```

```
+-----+
```

| Pick the XDCC pack number to request from XDCC |

| M for Manual to input easily multiple packs |

| N or Return will choose Next |

```
+-----+
```

|11 12 13 13 14 15 16 17 18 19 20 Next Manual Prev Quit|

+-----+

**11 to 20** - Request the pack number from the person the GUI is activated on.

**Next** - Moves the menus buttons to the Next 10 packs.

**Manual** - Takes you to the Manual Input Menu (Enter [Multiple] Packs via the keyboard

**Prev** (Appears when over 10) - Moves the menus buttons to the Previous 10 Packs (If Available).

**Quit** - Quits the XDCC-Get GUI and program totally.

## 1.12 XDCC-Get v3.41 - Full Menu Over-View - List & Manual Input Menu

Full Menus Over-View - List & Manual Input Menu:

This will first get a XDCC List off the person you set XDCC-Get to work on then open the GUI below.

If it responds nothing this may be due to your lag or the other persons lag.

If ya have waited for some time and you get no response, try to ping the person (/ping <nick>) if that takes a lot of time to get back or doesnt ever, the person has crashed or one of you two is lagged badly.

If the Ping replies, then try XDCC-Get with the other format, Example: Try Msg Format or CTCP Format.. the different one to what you tried previously.

( Msg or CTCP Menu of XDCC-Get )

( /XDCCGet <nick> ListManual ,m or /XDCCGet <nick> ListManual ,c )

\*Note: Lag/Lagged means the time to send a message to someone is long and slow, similar to jet la, as you feel tired/larthargic.

After it sends out the List to the person, it will open this GUI:

+-----+

|XDCC-Get v3.41 by lanky - Manual Input Pack Request Menu |@|

+-----+

| Enter numeric XDCC pack #'s to request from XDCC |

| You can put a space or . , - / + \* \ between each. Example: 5,8,12,18 |

+-----+

| +-----+ |

|| **String Here** ||

| +-----+ |

+-----+

| **Ok Quit** |

+-----+

**String Here** - Packs to request from the person the GUI is activated on.

**Ok** - Request the pack numbers entered or Quit of the string area is empty.

**Quit** - Quit XDCC-Get.

## 1.13 XDCC-Get v3.41 - Full Menu Over-View - Manual Input Menu

Full Menus Over-View - Manual Input Menu:

```
+-----+
|XDCC-Get v3.41 by lanky - Manual Input Pack Request Menu |@|
+-----+
| Enter numeric XDCC pack #'s to request from XDCC |
| You can put a space or . , - / + * \ between each. Example: 5,8,12,18 |
+-----+
| +-----+ |
|| String Here ||
| +-----+ |
+-----+
| Ok Quit |
+-----+
```

**String Here** - Packs to request from the person the GUI is activated on.

**Ok** - Request the pack numbers entered or Quit of the string area is empty.

**Quit** - Quit XDCC-Get.

## 1.14 XDCC-Get v3.41 - Full Menu Over-View - List

Full Menus Over-View - List:

This will get a XDCC List off the person you set XDCC-Get to work on.

If it responds nothing this may be due to your lag or the other persons lag.

If ya have waited for some time and you get no responce, try to ping the person (/ping <nick>) if that takes a lot of time to get back or doesnt ever, the person has crashed or one of you two is lagged badly.

If the Ping replies, then try XDCC-Get with the other format, Example: Try Msg Format or CTCP Format.. the different one to what you tried previously.

( Msg or CTCP Menu of XDCC-Get )

( /XDCCGet <nick> List ,m or /XDCCGet <nick> List ,c )

\*Note: Lag/Lagged means the time to send a message to someone is long and slow, similar to jet la, as you feel tired/larthargic.

## 1.15 XDCC-Get v3.41 - Full Menu Over-View - About

Full Menus Over-View - About:

```
+-----+
|XDCC-Get v3.41 by lanky - About Menu |@|
+-----+
| XDCC-Get v3.41. For any comments / ideas / suggestions contact me: |
| IRC: lanky - EMail: sykoe@sub.net.au - Web: http://www.sub.net.au/~sykoe/ |
```

+-----+

| **Ok Yam EMail IBrowse Voyager AWeb** |

+-----+

**Ok** - Takes you back the Main XDCC-Get Menu

**Yam EMail** - Open's Up YAM 1.3.x or 2.0.x and prepares a message to type to the Author.

**IBrowse** - Opens up the Author's Web Home Page on IBrowse.

**Voyager** - Opens up the Author's Web Home Page on Voyager.

**AWeb** - Opens up the Author's Web Home Page on AWeb.

## 1.16 XDCC-Get v3.41 - Full Menu Over-View - Quit

Full Menus Over-View - Quit:

The Quit button will Leave XDCC-Get totally. Putting you as you were before you ran XDCC-Get.

## 1.17 XDCC-Get v3.41 - FAQ

Frequently Asked Questions:

Q) What is XDCC-Get?

A) A GUI to easily and quickly do XDCC requesting.

Q) What is XDCC requesting?

A) An easy automated way to grab files off people in an IRC channel.

Q) Why can't people get files from me with XDCC-Get?

A) Because this is to get packs easily (leech). There are numerous tools on various formats to XDCC Offer (Give out files).

Q) What program would I use to set up a XDCC to offer from?

A) For AmIRC, Kuang 11 is the best I have seen. The easiest is the XDCC API built into AmIRC v2.0+. For Unix BitchX is very good.

Q) I have installed XDCC-Get but when I try to run it, it doesn't work?

A) Make sure rexxreqtools.library is in Libs: and XdccGet.amirx is in your AmIRC/Rexx drawer. If you are using the Alias /XDCCGet then re-enter it using /Alias XDCCGet /Rx XdccGet.amirx %p Then save your AmIRC prefs.

Q) XDCC-Get GUI is nice, but why isn't it MUI?

A) Because XdccGetFile originally was written to use RexxReqTools and still is as my main priority was to firstly get it to a level that I wanted. Its slow enough as is and I have optimised the code. With MUI it would be even slower. I will look into MUI though and do a trial version to see the speed.

Q) When I order a few packs through the Multi Input Window it sends the requests out slowly, Why?

A) I made XDCC-Get so you will not flood the person you are requesting packs from.

Q) Why doesn't XDCC-Get open a window that the list appears in and you click on the pack name to get it?

A) XDCC-Get is AREXX, to do that it would be very slow. Making it API (Which I am considering) would make it better. XDCC listings are also not uniform unfortunately which causes heaches on making such an option.

Q) Why doesn't XDCC-Get work on Windows(TM)?

A) It would require a 2000 Intel Parrallel CPU system that could warm up the dark side of pluto to 500,000 degrees celcius just to get it work like on an A500.

Q) When I use XDCC-Get for multiple manual inputs requests, I put in 1 5 8 and it comes back with an error that quits the program, why?

A) You are supposed to separate the packs with a , only (Example: 1,5,8). Also make sure the script is still called XdccGet.amirx as renaming it will cause troubles.

Q) Can I donate a small sum of money to author for his effort?

A) Yes, contact me via EMail to organise the best way if you wish to do so.

Q) I have an idea for it I wish to see, would you add it?

A) I have added nearly all additions requested off me that are possible. **Contact me** ASAP and I will definately try to implement it at least.

Q) Where do I get new versions of XDCC-Get?

A) At this stage Aminet or **me** directly on my XDCC. Also now available at: <http://www.sub.net.au/~sykoe/>

Q) I think I found a bug in XDCC-Get, should I notify the Author?

A) Please do **Contact me**. I enjoy feedback and hopefully one day I wish to remove all the bugs out of this program.

Q) I think I know a better way of doing some of the coding in XDCC-Get.

A) Please **Contact me** to let me know how.

Q) Can I use some of the code in XDCC-get in my own ARexx scripts?

A) Yes, I learnt and built this up by looking and learning at other's code (and also the good ol' Workbench 3.1 Arexx Manual).

## 1.18 XDCC-Get v3.41 - History

History:

For v2.1 and previous:

XdccGetFile.amirx 2.1 - (C) 1997 by Bossman^

IRC: Bossman^ Email: bosman@erols.com Web:www.erols.com/bosman

More of Bossman^'s AmIRC scripts can be found on his Homepage.

I thank Bossman^ for letting me expand XDCC-Get further.

XDCC-Get v3.0 onwards history:

Public Release

v3.41 Added: Fixed a missed bit of optimisation in my code.

(18.4.98) Added check for rexxsupport.library & rexxdossupport.library

(Including a fix for rexxreqtools.library check)

Added Thanks area to list properly all the people who have

helped me in my work on XDCC-Get.

Public Release

v3.40 Added: Fixed Which Screen Opening On Bug. (Dragster^)

(07.4.98) (Was from v3.37, Beta Testers.. Where were you?)

Public Release

v3.39 Added: Changed all menu titles.

(06.4.98) Changed all menu display format.

Fixed a stupid oversight, Usage Info is now faster.

---

Made help text appear properly.

Making a German translation (Translators HD Went B00M!)

(I don't know a word of German!)

Public Release

v3.21 Added: Made flood protection more bullet proof.

(24.1.98) (Now 1 request per 5 seconds)

Public Release:

v3.20 Added: Renamed Input Window with Multi Input Window.

(20.1.98) Added Multi & ListMulti Options.

Anti-Flooding Code on the Multi Pack Requesting Window.

Numeric Numbers Only Accepted on Multi Pack Requesting.

Greater Optimisation of Code (Less Lines Makes It Faster).

v3.19 Added: Added Multi Manual Pack Requesting Window.

(19.1.98) This was needed to work around a limit in RextReqTools so that the "," would be accepted.

Public Release:

v3.18 Added: Looped Pack Requesting on the Manual Input Window.

(18.1.98) (Required a bit of tinkering with the code)

v3.17 Added: Internal Option to Open a Separate Query Window to view

(18.1.98) XDCC Lists in. Like that they won't clutter your Channel Window. (Thanks Zarovich for the idea)

Public Release:

v3.16 Added: Fixed /XDCCGet <Nick> ListInput.

(13.1.98) Fixed Info on Alias setup in .amirc and .readme file.

(If Alias didn't work, Set-up with info from Usage)

Fixed \*ALL\* Internal Version Numbers

Added protection so only numeric packs will be ordered with /XDCCGet <Nick> <Pack>

Public Release:

v3.15 Added: Instant CTCP XDCC List.

(12.1.98) /Rx XdccGet.amirc <nick> LIST

Or use an Alias to make it a lot shorter..

/XdccGet <Nick> LIST

Instant CTCP XDCC List & Pack get.

/Rx XdccGet.amirc <nick> LISTINPUT

Or use an Alias to make it a lot shorter..

/XdccGet <Nick> LISTINPUT

v3.12 Added: Instant CTCP XDCC Pack get and Instant Input Window

(11.1.98) /Rx XdccGet.amirc <nick> <pack>

---

Or use an Alias to make it a lot shorter..

/XdccGet <Nick> <Pack>

Where Pack can be a number or INPUT to go straight to the Input Window.

v3.10 Added: Multi-pack request support. (Thanks Dragster^ for the idea)

(10.1.98) Changed Cancel's to Quit's for better looks, and function.

(Q at any time will Quit XDCC-Get)

Improved presentation of the Input Window.

Added Yam EMail to Author Button. (Under About)

Public Release:

v3.05 Added: Optimised the redundant Text.

(9.1.98) Changed local pack request text. (Thanks HeavyWeight)

v3.02 Added: Fix the pack selection. Somehow I missed Pack 14!

(8.1.98) Optimised the code even more (However slight that was)

NonClean Output Support Dropped.

Public Release:

v3.01 Added: /Msg Xdcc Support for Other Xdcc platforms.

(7.1.98) Cleaned Up Code.

More And Better Key ShortCuts.

[ First Warning Of No Nick Given Now Works.

Public (Warning doesn't work as a button due to AmIRC)

Release ] Clean Output (Hidden /CTCP & /Msg) Version.

Better Presented Generally.

[Contact](#) - How and where to contact all the authors

[Legalities](#) - Protecting the innocent from the money making lawyers

## 1.22 XDCC-Get v3.41 - AmigaGuide Manufacture

Manufacture of this AmigaGuide document:

This document was made in a plain ASCII editor with no extra utils. All done by hand.

For any improvements on this AmigaGuide [please notify myself](#).

I used in this AmigaGuide:

- Wordwrap, (Makes typing wrap around if you resize the reader screen size and even if you have different screen resolutions)
- Underline,
- Bold,
- Foreground text alteration, (I didn't do background text alteration because it looks generally cruddy)
- Index Support, (For v39+[OS 3+] users and Pre v39 [OS 2] users also! :)
- Browsing fully supported and controlled, (Next and Prev keywords)
- Use of different fonts,
- Basic setup for [Help Screens](#),
- and "Version" works on this AmigaGuide! (\$VER: )

## 1.23 XDCC-Get v3.41 - Help Pages

Help Pages !

If you are unable to find yourself navigating through this manual in AmigaGuide format, then I suggest you take a look at your Amiga manual.

If you require further information for use of this program, you can contact the author in various ways by clicking.. [HERE!](#)
