<i>Lecture 1 : What is an Object?</i>	7
• 2 Rules of Smalltalk	7
• What's special about an Object?	7
• OO versus Procedural Approach to programming	7
<i>Lecture 2: Classes and Instances</i>	11
• Class	11
• Instance	11
• Class Hierarchy	11
<i>Lecture 3: Messages, Methods, and Programming in Smalltalk</i>	13
• Messages	13
• Methods	13
• Programming in Smalltalk	14
<i>Lecture 4: OO Classification Techniques</i>	15
• Specialization	15
• Abstraction	16
• Composition	17
• Factorization	18
<i>Lecture 5: Encapsulation & Polymorphism</i>	20
• Encapsulation	20
• Polymorphism	21
<i>Lecture 6: OO 4-Pass Process – an Investment Manager</i>	22
• Pass 1: Abstraction	22
• Pass 2: Abstraction	22
• Pass 3: Composition	22
• Pass 4: Factorization	22
<i>Lecture 7: The Object Class</i>	27
• Functionality of an object	27
• Comparison of objects	27
• Copying objects	27
• Accessing indexed variables	28
<i>Lecture 8: Messages & Methods</i>	30
• Message Expressions	30
• Method Lookup	30
<i>Lecture 9: Variables and Return values</i>	32

• Method arguments	32
• Temp variables	32
• Instance variables	32
• Class instance variables	32
• Class Variables	33
• Global Variables	33
• Return Values	33
<i>Lecture 10: Blocks and Branching</i>	34
• Blocks	34
• Class Boolean	34
• Branching (Control Structures)	34
<i>Lecture 11: Reporting Errors and Debugging techniques</i>	36
• Error Handling	36
• Message Handling	39
• Class UndefinedObject	40
• Debugging	41
• halt	41
<i>Lecture 12: Designing and implementing classes</i>	43
• Steps to develop a specification	43
• The message protocol	43
• Steps to implementing a class	43
• Describing a class	43
<i>Lecture 13: VisualWorks</i>	44
Starting VisualWorks	44
VisualWorks Launcher	44
Workspace	45
Using the Mouse and the Pop-Up Menus	45
Setting up VisualWorks	45
Online Documentation	47
System Browser	47
Filing In and Filing Out Components	48
Filing In	48
Filing Out	49
Starting an Application	49
Saving Your Work	50

<i>Lecture 14: More on the Basic VisualWorks Environment</i>	51
Workspaces	51
The Transcript	52
Editing in VisualWorks Windows	52
Using a Browser	52
Adding a New Method	55
Adding New Classes or Methods From External Files	56
Changing Existing Methods	58
Adding a New Class	58
Saving Code into a File	61
<i>Lecture 15: System & Magnitude Classes</i>	62
• Overview	62
• Shared Object Protocols	62
• 4 basic subclasses of the Magnitude class	63
• Methods provided for comparison	63
• Example: More methods for complex numbers	64
• Partial Hierarchy	64
• Type Conversion	65
• Truncation, floor, ceiling and remainders	67
• Mathematical Operations	67
• Date and Time	68
<i>Lecture 16: The Collection Classes</i>	69
• Smalltalk's optimized Collection classes	69
• Partial Hierarchy	70
• Iteration (what you can do with collections)	70
<i>Lecture 17: An example using the Collection Classes</i>	73
<i>Lecture 18: The Stream Classes</i>	82
• Streams	82
• Important methods for all Streams	82
• Important methods for Positionable Streams	83
• Important methods for ReadStreams	84
• Important methods for WriteStreams	84
• Important methods for External and File Streams	84
• Common Mistakes	85

• Hierarchy	86
<i>Lecture 19: Matrix Example using Streams</i>	87
<i>Lecture 20: Dependency Mechanisms</i>	91
• Dependency	91
<i>Lecture 21: The Model-View-Controller Paradigm</i>	97
• Definitions	97
Model	101
<i>Lecture 22: The View</i>	105
View	105
<i>Lecture 23: The Controller</i>	110
<i>Appendix1: VisualWorks 2.5 versus Smalltalk-80</i>	113
Differences found throughout the lecture note's examples	113
• Classes removed from VisualWorks 2.5	113
<i>Appendix2: VisualWorks rules and Smalltalk Syntax</i>	114
• Capitalization rules	114
• Reserved words	114
• Operators	114
• Literals	114
• Comments	114
<i>Appendix 3: A List of Methods for the System Classes</i>	115
Magnitude:	115
Collection	119
Stream	124
<i>Index</i>	127
