Required:	UFailure.p	November 1, 1988
	UFailure.incl.p	November 1, 1988
	UFailure.a	November 1, 1988

GetZoneList is a sample application that uses AppleTalk's AppleTalk Transaction Protocol (ATP) and Zone Information Protocol (ZIP) to obtain a list of zones on an AppleTalk internet. It also demonstrates using a signal, or failure-catching mechanism, to recover from error situations.

GetZoneList is based on Sample, and we recommend that you review Sample or TESample for the general structure and MultiFinder techniques you should use when writing a new application.
