#24: SoundApp

Written by: Jim Reekes

Versions: 1.02   January 1990
                                       1.03   May 1990

Components: SoundApp.make   May 1, 1990
                               SoundApp.p   May 1, 1990
                               SoundApp.r   May 1, 1990
                               SoundAppSnds.r   May 1, 1990
                               SoundUnit.p   May 1, 1990

_____

This program requires MPW 3.0 or greater to build. For use with MPW 3.2, follow the instructions in the "SoundApp.make" file.
_____

SoundApp is a sample application for demonstrating the Sound Manager. It comes in two parts: SoundApp.p and SoundUnit.p. SoundApp.p handles the application's management of memory, errors, user interface, etc. It requires the use of the SoundUnit.p to handle all of the sound routines. SoundUnit code handles the Sound Manager part of the application. You can use this stand-alone UNIT in your own application.

Note: Version 1.02 of SoundApp was released as part of _Phil & Dave's Excellent CD: The Release Version_.
