	CEditCdev.make	August 1, 1988
	PEditCdev.make	August 1, 1988

EditCdev is a sample Control Panel device (cdev) that demonstrates the use of the edit-related messages and how to implement an `editText` item in a cdev. It utilizes the new undo, cut, copy, paste, and delete messages that are sent to cdevs in response to user menu selections.

EditCdev is comprised of two `editText` items which can be edited and selected with the mouse or the Tab key.
