1.3 What is TeaBot.

What is TeaBot.

An Amiga irc Bot program written in Arexx.

Please don't shudder when you hear the word Arexx, TeaBot tries his best to NOT
look like a Arexx based bot, in fact I ran this bot for 6 Months (While in
development on #Amigacafe) and nobody noticed it was written in Arexx :)
Please have faith ;)

[Back to Index](#)

1.4 TeaBot Installation.

So how do I install TeaBot ?

Copy c-codes.txt, faqlist, fish, Hangtemp, Hangwords, JLog, MCP.gurudat all to S:
Copy Fserv.amirx (If you wish to use it remember you MUST assign FServ: to you
file serv dir,

otherwise people may get access to parts of you hd that you may not wish them to
!) to Amirc/rexx dir.

a) Load TeaBot his own copy of AmIRC.

a) Ensure Arexx is running.

b) Load into AmIRC my provided Amirc config file, add any irc servers that you use.

IMPORTANT copy TeaBot.arexx to Ram: !! Don't even think of running it from HD.

c) Thats it TeaBot should make you instantly level 6 (More info on level later in this
guide). If for some reason it doesn't edit by hand the ram:jlog file and change your level to 6.

d) If you wish to use TeaBots File Serve, make sure that you Assign FSERV: YourDir:

OtherWise DON'T install the fserv.amirx file otherwise people may beable to steal your files ! I have warned you ! :)

Have fun ! :)

1.5 How to use TeaBot

How to use TeaBot

Probably the easiest bot to use !

TeaBot responds to **Commands** issued in the channel or by private message e.g.,

^Showcommand

/Msg Tea Showcommand

The ^ prefix isn't required when issuing commands via private messages.

TeaBot has a built-in wealth of **Commands** which are all available to the Level 6 operators.

[Back to Index](#)

1.6 TeaBots Commands

INFO

Shows current TeaBot version and local time.

SLAP

A fun command, Slap a user with a random fish

usage Slap <Nick>

PUNCH

A fun command, Punch a user in the face

usage Punch <Nick>

NACHOS

A fun command, buy Nachos for all on the current channel and send the bill to

<nick>

usage Punch <Nick>

COUNTRY

Convert Internet country codes to there real country name

usage Country [Country-Code]

E.g. ^Country CZ

TeaBot will respond with

TeaBot: cz is Czech Republic

URL

TeaBot grabs and stores URLs off the current channel, this command privately messages you all the URLs

SAY

Make TeaBot Talk,

usage ^Say [Message]

Eg ^Say Hello peeps

ME

Make TeaBot send a action to the channel

usage ^Me [Message]

FISH

Another Fun command just try it :)

usage ^Fish [Nick]

GURU

Makes TeaBot convert Guru Numbers

usage ^Guru [Guru number]

Thanks to AlienDesign for the GuruList.

NUT

Another Fun command just try it :)

usage ^Nut [Nick]

SVIEW

Shows users Status on TeaBot, shows netmasks and their levels.

usage ^Sview <Nick>

Level 4+ is required to specify a nick.

QUIT

Quit TeaBot off irc, this MUST be used to ensure the latest userlist is saved to Hard Disk.

NICK

Change TeaBots Nick

usage ^Nick <Nick>

HUG

Have TeaBot hug a IRC user :)

usage ^Hug [Nick]

FART

Guess ;-))

TRYME

This command only works if TeaBot has Operator status on the current channel.

You can play a game like Russian Roulette, if you lose instead of a bullet you get kicked off the channel :)

usage ^tryme

OP

OP yourself or another user,

usage ^op <nick>

Specify no nick and TeaBot will OP you.

DEOP

DEOP yourself or another user,

usage ^deop <nick>

Specify no nick and TeaBot will DEOP you.

TOPIC

Change the current channels topic if TeaBot has Operator Status,

usage ^Topic <what you want the topic to be>

SETGREET

TeaBot can greet user joins

usage ^SetGreet [Nick] [Greet]

VIEWGREET

Show the greet for the specified user

usage ^ViewGreet [Nick]

DELGREET

Delete the greet for the specified user

usage ^DelGreet [Nick]

HANGR

This is short for Hangman Reset, TeaBot can play a one player game of Hangman, but it must be reset first

usage ^HangR <Nick>

Specify no nick and the game is setup for you.

HANG

Play hangman ! If you don't know the rules ... :)

usage ^Hang <letter or complete guess>

The game must be setup with the HangR command.

FSERVASSIGN

Change the FSERV assign, can only be changed locally and requires Level 6 access.

1.7 About the Author

About the Author

After months of work (well on and off :) TeaBot is here, if you read the code you'll see that I'm a greater spotted newbie when it comes to arexx (TeaBot is my first Arexx project).

If you want to get in touch, perhaps to tell me how bad I am at Arexx or perhaps even to thank me, Just drop me a Email to;

Ste@Inorbit.Com

or perhaps if you feel like a one to one chat try to find me on irc on #AmigaCafe on the undernet, I hang about as MrQ :)

See ya peeps !

[Back to Index](#)

1.8 Cast and Crew

Who made this ?

Stephen 'MrQue' EVANS - Me ! The guy who made TeaBot. Mail me at Ste@Inorbit.com

David 'Dibbs' HANDSAKER - The one and only Beta tester, he also came up with a few good ideas which is quite strange for him :)

Michael 'Skeletor' RUSHTON - Wrote the File Serve script that TeaBot can launch :)

Nicholas 'Nich' PIPER - Got me into Arexx, also supplied me with some very cool Arexx guides.

Dave 'Hedgie' CUSICK - For the kind words in Amiga Format. And for also liking Kebabs ;)

Tom 'Fosters' BAMTON - For loads of testing and ideas on his Undernet channel #Liberty.

Pascal 'Logix' GLOOR - For writing Espresso (Another bot) which I nicked ideas from.

Tristan 'Merc' GREAVES - Found a little bug that I never saw :)

Jan 'Mamlason' HLAVATY - For fixing my HD and making Blizzmagic for my 040.

ALIENDESIGN - For letting me included the MCP.Gurudat file.

All on #AmigaCafe for testing and stuff :)

[Back to Index](#)

1.9 So how many versions of TeaBot ? :)

History :

Version 0.96 First Aminet release.

(05-02-98)

Version 0.96a/b Removed DCC chat launch of FServ, whoops it doesn't work ! :)

(06-02-98)

Version 0.96c Added pointer for FServ: to a Env variable, to save people doing assigns =)

(07-02-98) TeaBot pops up a requester if Fserv assign isn't there. Use ^FservAssign to

Change the assign after its already set (locally only).

[Back to Index](#)

1.10 What bugs ! :)

Known Bugs.

a) Faq is a little buggy in places.

b) Level as major problems, may be fixed soon with some kinda user-mask thingy.

c) Hangman can't handle flooding, I'm lame ! :)
