### 1.2 About DMS-Face

About DMS-Face Important Information

This software is provided as-is, without warranty either expressed or implied.

In no event will the author be liable for direct, indirect, incidental or consequential damages or loss of data resulting from the use of this software. The risk as to results and performance of this software is assumed entirely by the user.

DMS-Face is shareware, so if you find it useful, and use it regularly, I ask that you register DMS-Face for \$10.00 (U.S.). If you really cannot afford the \$10.00 fee, you may send me a registered version of a program you wrote that you feel is comparable to DMS-Face.

This program cannot be used for commercial purposes without written permission from the author.

Special permission is hereby granted to include DMS-Face in Public-Domain collections such as Fred Fish's Amiga Library, Aminet CD ROMS, etc.

What Is DMS-Face

DMS-Face is a program to ease the use of **DMS** for the Commodore-Amiga computer.

DMS-Face software and documentation are © 1994 by Øyvind Falch, Triumph Software.

All rights reserved.

---

## 1.3 Requirements

DMS-Face should run on any Amiga system with at least 512K RAM.

DMS-Face requires:

KickStart v2.0 or greater

MUImaster.library V2.0+

MUI-Classes

I have not included MUI since this would have made the archive a lot bigger. If the MUI-package is not yet in your possession, you should be able to find it at several Public Domain sites around the world, your local BBS or on Public Domain Disks.

The Graphical User Interface (GUI) was created using the great MUImaster.library V2.0 **MUI**, Copyrighted 1992/93 Stefan Stuntz.

DMS Version 1.53 or higher, since the program is an **DMS** Application.

For Registration see **Registration**.

## 1.4 Author

I have seen some interfaces to the DMS disk packing program, but no one have been so good that i have consider to use it. I wanted an DMS interface that I could use from programs like Directory Opus, and with Toolmanager, and not only from Workbench.

For Registration see **Registration**.

Other programs made by me (Latest Version):

Program: Description:

ADProRunner V1.5 Runs ADPro with memory spesification (MUI)

Icon Illusion V1.2 WB with 256 colors icons

Icon Illusion Converter V1.2 Icon Converter

PowerPlay V2.32 ModulePlayer (Out of Date, Dead!)

JumpScreen V2.0 ScreenJumper (Out of Date, Dead!)

## 1.5 UnPack

About UnPack Parameters:

Field Name Decription

Destination Drive: Drive to unpack DMS file to

Diskett Density: Diskett Type (DD or HD)

From Track: Start Track

To Track: End Track

Verify: Verify Diskett while unpacking

Validate: Validate Diskett after unpacking

---

Decrypt Password: Password for unpacking

UnPack Cancel

Start unpacking Quitting program

PS! without the DMS-Face.key, you will NOT be able to save the config settings, you have to use the one I have set to you.

For Registration see [Registration](#).

## 1.6 Pack

About Pack Parameters:

Field Name Description

Source Drive: Drive to Pack DMS file from

Diskett Density: Diskett Type (DD or HD)

From Track: Start Track

To Track: End Track

Validate: Validate Diskett after unpacking

Pack Zero: Pack Zero

Crunch Mode: Crunch Mode

FileText: Text displaying while unpacking

Encrypt Password: Password for Packing

Pack Cancel

Start Packing Quitting program

PS! without the DMS-Face.key, you will NOT be able to save the config settings, you have to use the one I have set to you.

For Registration see [Registration](#).

## 1.7 Config

About Config Parameters:

Field Name Description

DMS Path: FilePath for the dms command

OutPut: Output string for pack/unpack display

DMS path must be the full file path!, like this "c:dms153"

Example on output: "CON:140/30/460/220/DMS-Face/Close"

PS! without the DMS-Face.key, you will NOT be able to save the config settings, you have to use the one I have set to you.

For Registration see [Registration](#).

---

## 1.8 Usage

Cli and Workbench usage:

CLI usage:

DMS-Face [[-pl-P][-ul-U]] [Filename]

Flags:

-pl-P: Pack file

-ul-U: Unpack file

Filename = File unpack or File to pack. (Depending on your actions)

Examples:

DMS-Face -u test.dms UnPack file test.dms, you just need to select device and press Unpack.

DMS-Face -p test.dms Pack file test.dms, you just need to select device and press Pack.

DMS-Face DMS-Face will ask for file to unpack. (Works without parameters!)

DMS-Face -u DMS-Face will ask for file to unpack.

DMS-Face -p DMS-Face will ask for filename to pack to.

If you have Directory Opus, or Toolmanager,etc you already know how to install it ! :-)

WorkBench usage:

After Double clicking the icon the DMS-Face window will appear, and ask for file to unpack.

Warning:

In this version of DMS-Face the program will NOT check if the file you select to unpack, exist for real or warn you for overwriting an old DMS file.

## 1.9 History

DMS-Face History

Version 1.0 (18.6.94)

First release

## 1.10 Registration

DMS-Face is SHAREWARE. If you like this program and would like to get rid of those irritating requesters, you should send me one of following.

OTHER COUNTRIES: (EUROPE, USA.....)

Payment options are:

1. 10 US Dollars.
2. Other currency. (Worth of 15 US Dollars)
3. 70 NOK.

DON'T send checks!! Sending the money using checks is expensive for you and

---

it is expensive for me, only banks benefit from it.

Cash is the most easiest way to pay the fee, it has its own risks

but if you wrap little paper around money then no one will see'em and steal them. If you know any other easy way to send money, use it. Just make sure it doesn't cost me something like half the fee to get it cashed.

If you are sending some other currency than US dollars or Norwegian kroner, then the sum does not have to be EXACTLY equal to 15 US dollars, I'd appreciate if the sum would be atleast 10-15 dollars. Whatever sum in that range is the easiest to exchange to your local currency's notes.

Send your letter to following address.

Øyvind Falch,  
Triumph Software  
PostBox 240  
3192 Horten  
Norway

You should include something like following with the payment.

\*\* CUT HERE \*\*\*\*\* CUT HERE \*\*\*\*\* CUT HERE \*\*\*\*\*

Yeah, I would like to register DMS-Face and by paying  
above mentioned amount of money I will ensure myself a quick  
keyfile delivery on normal DD amiga FFS formatted disk.

I HAVE INCLUDED FOLLOWING AMOUNT:\_\_\_\_\_

NAME:\_\_\_\_\_

ADDRESS:\_\_\_\_\_

ZIP CODE:\_\_\_\_\_

COUNTRY:\_\_\_\_\_

AMIGA TYPE I AM USING:\_\_\_\_\_

HARDWARE WITH AMIGA:\_\_\_\_\_

BUGS THAT I HAVE FOUND FROM MY VERSION \_\_\_\_\_ DMS-Face

\_\_\_\_\_  
\_\_\_\_\_

IDEAS FOR FUTURE VERSIONS:

\_\_\_\_\_  
\_\_\_\_\_

\*\*\* CUT HERE \*\*\*\* CUT HERE \*\*\*\* CUT HERE \*\*\*\* CUT HERE \*\*\*\*\*

Allow 1 to 3 weeks for delivery via snail mail. For European  
users the normal time is under 2 weeks.

## 1.11 Glossary

Glossary:

The DISK-Masher (DMS) is a utility which allows one to archive whole disks while preserving the disk-structure. DMS offers varying modes of compression ranging from very simple to very deep compression.

## 1.12 About MagicUserInterface

This application uses

MUI - MagicUserInterface

(c) Copyright 1993 by Stefan Stuntz

MUI is a system to generate and maintain graphical user interfaces. With the aid of a preferences program, the user of an application has the ability to customize the outfit according to his personal taste.

MUI is distributed as shareware. To obtain a complete package containing lots of examples and more information about registration please look for a file called "muiXXusr.lha" (XX means the latest version number) on your local bulletin boards or on public domain disks.

If you want to register directly, feel free to send

DM 20.- or US\$ 15.-

to

Stefan Stuntz

Eduard-Spranger-Straße 7

80935 München

GERMANY
