Chapter 1

GClock

1.1 GClock User Manual

```
*************************************************************
*              GClock (c) 1994 Gothsoft Inc              *
*                                                        *
*          Software & Docs by  James W Savage            *
*************************************************************

                        The dull bit...
                         What it is...
                             Why?
                        How do I do it?
                        Limitations...
                    System Requirements...
                    And now, the greets...
                          Shareware?
                        Gothsoft Inc..
```

1.2 The dull bit...

This product is being put into the Public Domain by James W Savage of
Gothsoft Inc. It can be GIVEN to anyone but can not be sold as a
commercial product. I t must only be distributed in conjunction with this
doc. The copyright is held by me, so don't put it on any BBSs which re-
copyright everything to themselves. Nobody, anywhere, I don't care who, is
allowed to alter this program or this doc. If you do, I will find out, so
remember – The power of the law is greater than the power of your
disassembler.

1.3 whatitis

A device for informing you of the exact quantum of your existance.... Yeah,
yeah, it's a clock.

1.4 Why?

Firstly, because I was bored and when I'm bored I either play Elvira
Mistress Of The Dark or I program, and as Elvira doesn't work on my
4000/40, my choice was limited.

Secondly, because I missed Babylon 5.

Thirdly, because it's there.

1.5 How do I do it?

It is dead easy. All you do is follow these steps...

1) Double click on the icon, or I suppose you could put it in WBStartup.

That's it.

1.6 Limitations...

There is no alarm facility, but I might add one if you want.

1.7 System Requirements...

It was written on a 3.0 A4000/40 with 2 meg chip, 8 meg fast and a
GVP ioExtender. It should run on any 2.0 machine, below that I don't know
and I'm not dismembering my Lorraine to find out!

1.8 And now, the greets...

A big hellooooo and many thanks go out to the following people :

The rest of Gothsoft Inc:

Roy Startup
Sarah Marshall
Simon Rachael

The Gothsoft Inc support team:

Tara Greaves
Jon Greaves
Kevin Wright
Ian Davidson

The Gothsoft Inc beta testers:

Lee Suttle

And the rest, in no particular order:

Ashley Russel, Colin & Fiona McCarten, Neil Morris, Robert Newman, Charles
Thornhill, Steve Chalmers, Ryoga P-Chan (or is it Barry?), the MANGA lot,
Jason Ullett, Per Jacobsen, Carole Backler, the IMAGES lot, the WORKBENCH
lot, oh hell lets just say all of FidoNet, Heidi Evans, Andrew Cunnington,
and of course, Centronics BBS.

Special greets to Acid Software, for making it happen.

Extra special greets to Jan Williams, for being the blue care-bear.

1.9   Shareware?

Nope, its GOTHWARE. If you use this and like it I suggest you send me
something Gothic ie black. Anything, anything at all, just make sure its
black. In return you will be put on my mailing list and will be sent the
latest version of GClock as well as any other GOTHWARE that I have
written, such as TTR and The GothTest.

I can be contacted at any of the following addresses :-

```
Snailmail - Gothsoft Inc
            4 Donside
            Stratton
            Cirencester
            Gloucestershire
            GL7 2LX
            ENGLAND

Email  Fidonet  2:2501/307.13
       Internet Bryce@gothic.demon.co,uk
```

```
                  KEEP DEVELOPERS DEVELOPING
                    (and goths being goth)
```

1.10   Gothsoft Inc...

Gothsoft Inc are a team of skilled programmers, designers and visionaries
dedicated to the production of quality software. We write software for
modern systems, not dead ones.

We are:

Sarah Marshall
Simon Rachael
James W Savage

Roy Startup

Coming Soon...

Horror At Gravedale Tech
A horror/fantasy graphic adventure for the Amiga CD^3$^{2} incorporating
photorealistic images and computer graphics.

Due: Winter Solstice 94

1.11 Centronics BBS

Centronics is based in Ipswich, UK and is absolutely the friendliest BBS in
the country.

It features free instant access, several gigabytes of files, 500+ mail
areas, FidoNet, Usenet, FTP by mail, internet addresses, UK April support,
Gothsoft Inc support, Scribble PD, a relaxed atmosphere and several
hundred co-sysops :)

Centronics is run by Jon Greaves, with the help of Tara Greaves, Kevin
Wright, Roy Startup, Johnathan Taylor and James Savage.

Call Centronics on 0473 273246 - All speeds from 300 to 28,800.
