1.2 Introduction

   PlaySample is a little utility which makes it possible to play 8SVX files.

   This program can only be run under Kickstart v2.04 or higher and uses the locale library if it exists. For the moment, only English and French are available.

1.3 Starting from the Workbench

   Once PlaySample has been started by clicking twice on its icon, it opens a file requester asking for a file to play. If the file chosen by the user is a 8SVX file, it is then played.

1.4   Starting from the Shell

When PlaySample is started from the Shell, the syntax is :

  PlaySample [<sample>] [REQ], where :

    <sample> is the name of the 8SVX file,

    REQ tells PlaySample to display a possible error message in a
        requester and not in the Shell window.

If the <sample> file is actually a 8SVX file, it is played.

1.5   Error messages

PlaySample can display the following error messages :

  "Can't open intuition library v37" :

    The intuition library version 37 (or higher) is not available.
    You should use a more recent Kickstart version (at least 2.04).

  "Can't open dos library v37" :

    The dos library version 37 (or higher) is not available. You
    should use a more recent Kickstart version (at least 2.04).

  "Can't open graphics library v37" :

    The graphics library version 37 (or higher) is not available.
    You should use a more recent Kickstart version (at least 2.04).

  "Can't open iffparse library v37" :

    The iffparse library version 37 (or higher) is not available.
    You should use a more recent Workbench version (at least 2.04).

  "Can't open asl library v37" :

    The asl library version 37 (or higher) is not available. You
    should use a more recent Workbench version (at least 2.04).

  "Out of memory" :

    PlaySample needs more memory. Try to free some by closing some
    applications or windows.

  "Can't read file" :

    The chosen file cannot be read. This might be caused by a non-
    existent file name, a disk removed too quickly from the drive, a
    lack of memory, ...

  "The file is not an IFF file" :

```
    The chosen file is not an IFF file.

  "The file is not an 8SVX file" :

    The chosen file is not an 8SVX file.

  "The file is a musical instrument file" :

    This file is an 8SVX file but it contains the description of a
    musical instrument and not a one-shot sound.

  "Can't get an audio channel" :

    All audio channels are allocated. Try to free one by closing an
    application using one.
```

1.6 History

```
  08.08.94 : first released version (0.9) of PlaySample.
```

1.7 Copyright

```
   PlaySample is a freeware. This means that it is copyright by Jean-
Yves Oberlé but it may be freely distributed.
