  This guide contents :

 Chapter  1 : Introduction About EShow
 Chapter  2 : Distribution About Copyright
 Chapter  3 : Using EShow  About EShow use
 Chapter  4 : REXX port    About REXX commands
 Chapter  5 : Author       About the author
 Chapter  6 : Credits
```

1.2   Chapter 1: Introduction

```
Introduction
-------------
EShow is a simple IFF Viewer.
It is small and AGA compatible.
It is localised.
It is system friendly and incorporates a nice REXX port.
It was programmed in E in one day (03 Feb 1995).
It is POSTCARDWARE, i.e. if you like it and use it please send a postcard
to the author.
```

1.3   Chapter 2: EShow distribution

```
Distribution
-------------
 Permission is granted to anyone to use this software for any purpose
 on any computer system, and to redistribute it freely, with the
 following restrictions:

 1) No charge may be made other than reproduction and distribution costs
    even if either part or totality of the software, and/or his
    documentation is translated in any natural or computer language.
 2) The author(s) is (are) not responsible for any
    harmful consequences of using this software, even if they result from
    defects in it.
```

1.4   Chapter 3: Using EShow

```
Starting from Shell (Requires OS2.0+)
--------------------
     Command line syntax: EShow
     Same as Workbench.

Starting from Workbench (Requires OS2.0+)
-----------------------
     Double-click the icon or move it into WBStartup drawer.
     EShow is installed as a commodity.
     Available tooltypes are:

DONOTWAIT
     To detache.

TOOLPRI
     Set task priority.

STARTPRI
     Set start priority in WBStartup drawer.

CX_PRIORITY
     Set commodity priority.

CX_POPKEY
     Set HotKey, default is control alt s.

CX_POPUP
     Open a Window if set to YES , default is NO.
     The Window is font sensitive and is an AppWindow.

PUBSCREEN
     An already opened public screen, default is the default pubscreen.

     IFF pictures (not ANIMs) are diplayed by dropping them into
     the AppWindow, or via "Load" gadget or menu.
     Press Left Mouse Button to end the display.
     Select "Quit" menu or "Quit" gadget, or send a CTRL-C break to exit.
     Pictures larger than screen can be scrolled with mouse.
```

1.5   Chapter 4: EShow REXX commands

```
Rexx commands
-------------
EShow REXX port name is ESHOW.1
REXX commands can be sent via RX, or double-clicking ".rexx" icons, or via
any other rexx host like CygnusEd, GoldEd, AdPro ...

SHOW
    Show EShow commodity.

HIDE
    Hide EShow commodity.

DISPLAY picture
    Display an IFF picture.

DISAPPEAR
    End the display.

QUIT
    Remove EShow commodity.
```
