Chapter 1

WrapGuide-Demo

1.1   Demonstration Guide for WrapGuide

This document is written with only AmigaGuide® V39/V40 in mind, using a proportional font and long lines. The long lines are automatically wrapped by the 3.x AmigaGuide® but AmigaGuide V34 which is the version that operates under Kickstart 2.x is unable to wrap words and instead requires you to endlessly scroll horizontally to read these long lines. In other words, if you are reading this text under AmigaGuide V34 and have not run it through WrapGuide or otherwise manipulated it, you will probably have gone insane by now, scrolling and scrolling without end.

WrapGuide to the rescue!

If you are concerned what effect the presence of style and link symbols might have, just click here to get some more demos.

1.2   Silly links...

The following are all links that lead nowhere; they're just here to give you an idea what the links look like when they are processed with WrapGuide:

Cooking Instructions -- How to prepare tofu so it's quite yummy instead of wobbly, slimey, cold, and tasteless. Internationally renowned chef To-foo Mi explains marinating , squishing, as well as the art of making fresh tofu stick to the ceiling and to stainless steel kitchen appliances .

1.3   Pulp Fiction

Mother tomato, father tomato, and baby tomato are walking down the street. Baby tomato, being tired and all, starts lagging behind, which aggravates father tomato to no end. After a while, father tomato turns and walks back to where baby tomato is slowling trotting along. In his anger he squishes baby tomato: "Catch up! (Ketchup)"

Yes, I "stole" the joke from the movie Pulp Fiction.
