The CERN Imagemap Format

• NOTE: The CERN format does not allow ovals to be specified in its ".map" files.   Therefore, when you are editing a GIF with WebMap, and you have CERN specified as the default format, all ovals will be constrained to true circles.

| Keyword | Coordinates | URL |
|---|---|---|
| rect | (x,y) (x,y) | your_url_here |
| circle | (x,y) radius | your_url_here |
| poly | (x,y) … (x,y) | your_url_here |

Rectangles are specified by their left, top, right and bottom coordinates.

Circles are specified by a center point and a radius.

Polygons are specified by a list of vertices.
