1.2 Introduction

Introduction:

Because there is no pgp-support for UMS available yet, I've written this small script to make it easy to handle received pgp-mails.

1.3 How does it work?

How does it work?

Joe receives one or more pgp-mails. These mails must be <new>! UMSpgp will detect these mails, asks for your pgp-password, decrypts these mails and Postmaster will send the decrypted mails to Joe. The pgp-mails-status will be set to <old>.

Another mail would be created and send from Postmaster to Joe which contains some information about this procedure.

1.4 Contents

Contents:

The archive must contain the following files:

```
Directory of ums:pgp
-----rw-d 21:50:00 08-Dez-94 60001 60000      1370 info_main
-----rw-d 21:50:00 08-Dez-94 60001 60000      617 pgp_from_txt.mfm
-----rw-d 21:50:00 08-Dez-94 60001 60000       10 pgp_msg_txt.mfm
-----rw-d 21:50:00 08-Dez-94 60001 60000      152 script_main
----s--rwed 21:50:00 08-Dez-94 60001 60000       94 umspgp
-----rw-d 22:06:08 08-Dez-94 60001 60000     4066 umspgp.doc
-----rw-d 22:02:54 08-Dez-94 60001 60000      533 umspgp.doc.info
-----rw-d 22:06:28 08-Dez-94 60001 60000     4641 umspgp.guide
-----rw-d 22:02:54 08-Dez-94 60001 60000      517 umspgp.guide.info
-----rw-d 22:02:54 08-Dez-94 60001 60000     1633 umspgp.info
----s--rwed 21:50:00 08-Dez-94 60001 60000     1783 umspgpcheck
 49 Blocks, 15,492 Bytes used in 11 files
```

1.5 Installation

Installation:

Two users are recommended to use this script: one user, e.g. 'Joe' (yourself) and a second user e.g. Postmaster or Sysop.

Just extract the archive to ums:. A new directory will be created, where the above mentioned files would be copied to.

That's it. (no more 'search & replace'-actions yet ;-))!

1.6 Usage

Usage:

From Shell:

```
umspgpcheck <user> <passwd> <postmaster> <p's passwd> <server>
```

The mails which <user> has received, will be checked. If there are pgp-mails, then they will be decrypted and <user> will receive the decrypted one from <postmaster>.

From Workbench:

There is another file called 'ums_pgp'. Edit this file and insert your favorite usernames and passwords. Then you have only to double-click these icon.

1.7 Requirements

Requirements:

- Pretty Good Privacy (c) 1990-1993 Philip Zimmermann, Phil's Pretty Good Software. Jun 24 1994 - Thanks Phil!
- Sumstools2.7a:
 - TITLE : sumsset, sumsprint, sumswrite, sumsfolder
 - AUTHORS : Stefan Stuntz <stuntz@informatik.tu-muenchen.de>
 - AUTHORS : Bernhard Moellemann <zza@rz.uni-karlsruhe.de>
 - AUTHORS : Matthias Scheler <tron@lyssa.owl.de>
 - AUTHORS : Klaus Melchior <kmel@eifel.oche.de>
 - COPYRIGHT : Public Domain
 - REQUIREMENTS: Kickstart 2.x, UMS release V10

Thanks Stefan, Bernhard, Matthias and Klaus!

1.8 ToDo

ToDo:

- write installation-procedure
- support of sending pgp-mails

1.9 Bugs

Bugs:

- not known

1.10 History

History:

- v 0.1 (20-Nov-94) o initial release
- v 0.2 (08-Dec-94) o no more 'search & replace'-actions during installation
 - o simple and flexible usage from shell and workbench
 - o AmigaGuide (R)-documentation

1.11 Etc.

Etc:

It's giftware, (C) Jochen Borgmann 1994; it's not allowed to distribute umspgp for commercial use without my permission. The archive must contain the above mentioned files.

If you find a bug or have any suggestions please send a mail to: "gio@cyra.westfalen.de" or use snailmail:

Jochen Borgmann
Gruenstiege 4
48599 Gronau
