

Memo: Preliminary 2.5" IDE Drives Evaluation  
Date: May 21 1992  
To: Leonard Tramiel, Richard Miller  
From: Minna Lai

Manufacturer: Conner Peripherals  
Model: CP-2064 (60Mb)  
Firmware: Version 1.14  
Comments: Two units of this model were tested. No problem with formatting the units  
no error reported in the write-read-verify test.

Manufacturer: Seagate  
Models: ST-9051A (40Mb) (Firmware version: 07.07.00)  
ST-9096A (80Mb) (Firmware version: 07.07.03)  
ST-9144A (120Mb) (Firmware version: 04.04.02)  
Comments: Two units of each model were tested. There need to be a minor change in  
format software for the models ST-9096A and ST-9144, which does not affect other vendors' drives. With the change  
there is no problem with formatting and no error reported in the write-read-verify test.

Manufacturer: Toshiba  
Model: MK2024FC (80Mb)  
Comments: One unit of this model was tested. This model requires the same minor  
change in the format software as for the Seagate drives. With the change, there is no problem with formatting and  
error reported in the write-read-verify test.

Regards,

Minna Lai
