Grader is a control panel file written by Duane Franklet of the English Computer Writing Lab at the University of Houston. It is designed to help teachers to comment on papers on-line.  The teacher configures Grader to insert comments one to a keystroke combination. Also can be used by anyone desiring a general purpose text-insertion utility. Tested across a wide variety of applications and runs with System 7 in 32 bit mode. Send comments or problem reports to Duane Franklet, "ENGLHQ@jetson.uh.edu."
