Here's a wonderfully useful INIT. Just drop it in the System Folder and let it go. It hasn't been extensively tested, so send all bug reports to my E-mail address:

Here's the shareware rap: if you keep Move Window in your System Folder, then you don't have to do anything. However, if you remove it or erase it, then please send a letter to Stephanie explaining why you did so. If you feel compelled to include money, she won't complain. Here's her address:
