About

SartogaKey

by Gernot Eger

What it is:

SaratogaKey is an INIT resource that lets you use the first four function keys F1 to F4 on the Saratoga Keyboard of Apple. You can use them for Undo, Cut, Copy, Paste and operations.

How to use it:

Just put the File SaratogaKey into the System Folder, and restart your Mac!

SaratogaKey

Be aware that you will not notice any changes if you don't use an SE or MacII with the *extended* Keyboard.

And now try your new keys and have lots of fun!
