1.3 Features

Features of MUI AFS-Undelete
 ~~~~~

- \* Detect any AFS mounted partition.
- \* Undelete any file (upto last 31 deleted files).
- \* Auto renaming (gets rid of the @XXX location number)
- \* Provides information about your AFS partitions
- \* Uses the great MUI !

### 1.4 Requirements

Requirements  
 ~~~~~

- * KickStart 2.0 or better
- * MUI v3.0 or better installed
- * AmiFileSafe from Fourth Level Developments, installed correctly on your HardDrive partition(s).

Important : MUI AFS-Undelete works only on HardDrive partitions !

1.5 Installation

Installation
 ~~~~~

Just copy the MUI AFS-Undelete Icon wherever you want to use it from.

### 1.6 Using MUI AFS-Undelete

Using MUI AFS-Undelete  
 ~~~~~

If you have an I.Q. greater than 50, you don't really have to read the following explanations to use MUI AFS-Undelete ;-) !

For the others :

Once you have launched MUI AFS-Undelete by clicking its icon, you have to select the AFS partition you want to work on; the first AFS partition found by the program is selected by default. A "DESTINATION" tooltip enables to give a default destination to the undelete operation.

The first of the two pages of the interface provides some pieces of information about the selected AFS partition such as its name, size in mega bytes ...

The most interesting part of this program is located on the second page which includes the interface elements enabling to undelete files; those elements are:

- a list view in which you can select the files of the current AFS partition you want to undelete
- a destination requester
- a button to start the undelete operation

So, to undelete :

- select the files you want to undelete
- select a destination
- click the undelete button

Furthermore, help bubbles will show off if you keep the mouse pointer still on an element of the interface.

1.7 Legal Stuff

Legal stuff

~~~~~

MUI AFS-Undelete is FreeWare. The program and files in this distribution are freely distributable, but are also Copyright (c) Guy~Ballet.

The archive may be freely distributed as long as no more than a nominal fee is charged to cover time and copying costs.

## 1.8 disclaimer

Disclaimer

~~~~~

No warranty, either express or implied, is made with respect to the fitness or merchantability of MUI AFS-Undelete.

The author neither assumes nor accepts any responsibility for the use or misuse of these programs. He will also not be held liable for damages due to loss of profit or any other damages arising out of the use, or inability to use this program.

The author will not be liable for any damage arising from the failure of this program to perform as described, or any destruction of other programs or data residing on a system attempting to run the programs. The user of this program uses it at his or her own risk.

1.9 Acknowledgment

Acknowledgment

~~~~~

Thanks to Stefan Stuntz for creating the very cool MUI system, and to Eric Totel for the usefull MUIBuilder.

Thanks also to Jerome Vuittenez for doing some betatesting.

And at last, thanks to Sam Becket, who inspired me the idea to develop MUI AFS-Undelete with his program Undelete.

1.11 About MUI

This application uses

MUI - MagicUserInterface

(c) Copyright 1993/94 by Stefan Stuntz

MUI is a system to generate and maintain graphical user interfaces. With the aid of a preferences program, the user of an application has the ability to customize the outfit according to his personal taste.

MUI is distributed as shareware. To obtain a complete package containing lots of examples and more information about registration please look for a file called "muiXXusr.lha" (XX means the latest version number) on your local bulletin boards or on public domain disks.

If you want to register directly, feel free to send

DM 30.- or US\$ 20.-
