1. QUICK START USING GEN5

1.1 Generality

Gen5 is a full genealogy application for PSION S5, 5MX, REVO and S7. It takes advantage of its experience owned by “Arbre Généalogique” for PSION S3.

It gives genealogy Psion's mobility, in consultation as in creation/update. With Gen5, you can also :

- load a GEDCOM file copied (but not convert) with PSIWIN, coming from another genealogy program (PC, ...),
- convert your data base as GEDCOM file meant to be used with another genealogy program.

After register, a family tree will store thousands of persons, 5 couples for a person and 24 children for a family.

1.2 Files contains in Gen5206.zip

- Essential programs and helps files in English, French, German and Italian language: Gen5.sis,
- Quick English documentation Gen5GB26.doc (Word for windows) and French documentation Gen5FR26.doc (Word for windows) and quick German documentation Gen5Ge26.doc and quick Italian documentation Gen5It26.doc,
- Readme.txt, Lisezmoi.txt and Liesmich.txt,
- The example file : Fidemo.

1.3 Installation

With this new version, the format of the dates (DD.MM.YYYY or MM.DD.YYYY) is the format of your preferences.

1) There are 2 methods to install Gen5 depending on where you have copied the .sis file and what set-up you have :

- On a PC :

From PSIWIN, double click the Gen5.sis file, this will automatically install Gen5 on your machine.

If that doesn't work right click the My Psion icon and click the Install New Program option. If you do not have the Install New Program option then download setup.exe, install it and try again.

- On a EPOC32 Machine

Tap the Gen5.sis file to install Gen5.

If this does not work then you do not have the Add/Remove utility, in this case download instexe.exe and copy it to your machine and try again.

2) Tap the Gen5 icon on the extra's bar.

3) To uninstall goto the Control Panel, tap the Add/Remove icon, select Gen5 and finally press the Remove button.

1.4 If you have Gen5 V1.x

The V2.0 database is not the same that the V1.x database.

You must :

- Save your disk,

- Convert your V1.x database as GEDCOM file (Option Export GEDCOM File),
- Delete your old files, and \SYSTEM\APPS\Gen5 folder,
- Install Gen5 V2.06 (see 1.3),
- Enter your V1.x personal code on V2.06 Register option (Ctrl+E),
- Import your GEDCOM file.

1.5 Begin to used

Tap the Gen5 icon on the extra's bar. Now, you can create your ancestral tree person by person or import a GEDCOM file.

To create the first person, use “ Add other ” under “ Update ” menu, “ Add card ” option.

Filling as a priority the name, surname and select gender fields. Other fields are optional.

Buttons to use :

Ctrl+D or Details button to go to the second data screen,

Esc or Cancelling button for cancelling all the modification (first and second screen),

Ctrl+S or Saving button for saving all the modifications (first and second screen).

When the first person is created, Gen5 switches to display mode. You will then complete your family tree creating spouse, parent or children.

2 DISPLAY PERSON

Last name:DUBOIS										DemV2	
First name:Philippe										View	
Gender :Male										Find	
Born on:15.12.1955 at Marseille (13)										List	
Died on:12.10.1956 at Tarascon (13)										Close	
Point de départ de cet exemple réalisé pour illustrer la version 2 de Gen5. Cette nouvelle version représente une évolution majeure. Elle offre en particulier, une refonte de la saisie, de la fiche couple, plus de fonctions accessibles au stylet et des notes personnelles allongées.										15:29 Sam 9

Return to the principal screen

Philippe DUBOIS	Ret.
Denomination: Catholique	
Baptized on: 2.03.1955at Marseille	
Buried on: at	
Occupation: Ingénieur maintenance d'une usine de production de caoutchouc, chef de projet informatique puis cchef de service production	
Training: BAC C à Marseille puis, après les concours en fin de Spé, rentre dans une école d'ingénieur	

2.2 File Menu

New : (Ctrl-n) Saves the data base and creates a new one,

Open : (Ctrl-o) Saves the data base and open another one,

Option Save as : (Ctrl-a) Saves the data base under a new file name wich becomes the current name,

Option Save : (Ctrl-s) Saves the current data base,

Option Revert to saved : (Ctrl-r) Cancels any changes and reverts to the previous version,

Option Import GEDCOM file : (Ctrl-i) loads a GEDCOM file copied **but not converted** with PsiWin, coming from another genealogy program (PC...). See GEDCOM key-words on characteristics.

Option Export GEDCOM file : (Ctrl-x) Converts a GEDCOM file meant to be used with another genealogy program,

Option Add a Gen5 file : (Shift-Ctrl-K) Add up a Gen5 database to the current file,

Close : (Ctrl-e) quits Gen5 after saving the current base.

2.3 Menu Display

Details : (Ctrl-d) displays details on the current card if the upper right button D is displayed,

List : (Ctrl-l) switches in list mode. This mode allows you to select a person using the stylus.

Keys to use in list mode :

- Ctrl+Down / Up and buttons : Next page / home,
- Down / Up : next / previous line,
- Right and Left : move,
- Ctrl+Right : end right, Ctrl+Left : beginning left
- Enter : Display the card.

Find (Shift-Ctrl-F) Display persons found by :

- person's last name and first name (also find button),
- Id (also Id button),
- SOSA Id (also SOSA button),
- Dates,

- Without link,
- Without parent
- Without couple.

When you find a person by his name or surname, you can use ? to replace a letter and * to replace several letters.

Father and Mother : (Ctrl-f or Ctrl-m) displays one of the parents,

Couple : (Ctrl-C) displays a spouse list if there are several.

2.4 Menu Update

Update card : (Shift-Ctrl-U or U button) modifies or completes the current card,

Update notes : (Shift-Ctrl-N or N button) creates or updates notes related to the current person,

Add card - Parent : (Shift-Ctrl-P) Creates a parent (father or mother). His rank gives his position in the created family,

Add card - Marriage : (Shift-Ctrl-M) Creates a new couple (Maximum 5). If there already is a couple (one parent and one or several children), you must use the menu option Union from the couple card,

Add card - Child : (Shift-Ctrl-C) Creates a child (Maximum 24 per couple). Children are created by chronological order in the selected couple with the down key on the parent card. If a couple exists, you may directly create a child with the Enter key beside the right number,

Add card - other : (Shift-Ctrl-A) Add a person without link, by exemple the first person of database,

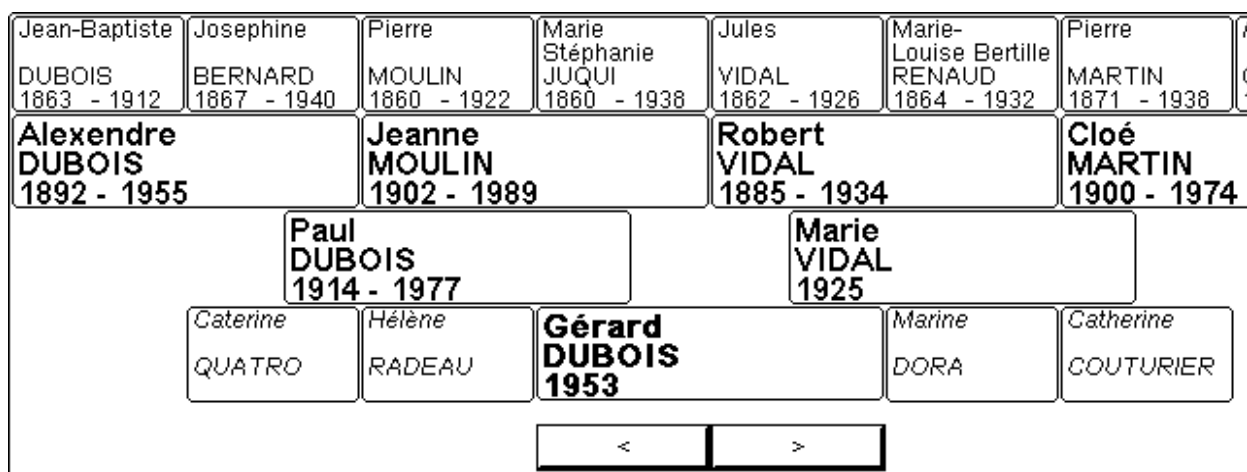

Delete card : (Shift-Ctrl-D) deletes a card on condition that this card has no more than one family tie.

2.5 Menu View

Zoom In and Out : (Ctrl-w and Shift-Ctrl-W) modifies the zoom level. Works also with the stylus,

Family tree : (Ctrl-t or T button) Allows to graphically display the current person, his or her spouse and the three previous generations. You can select the person using the stylus.

Keys to use : Left and Right moves inside the tree, Esc or Enter : Back to display mode.

View Descendants : (Ctrl-v or V button). Displays the 60 first descendants belonging to the 4 next generations. You can select a descendant using the stylus or the Enter key.

- Keys to use : Up / Down : To move inside the list,

- Ctrl+Up / Down : Top / end of the list,
- Enter : Display selected person's card,
- Esc : Back to the initial card, Zoom In and Out.

2.6 Menu Tools

Opening preferences : (Shift-Ctrl-O) forces Gen5 to open the current data base on the selected card,

SOSA :

- Initialize N° SOISA : delete all the SOSA numbers and add new SOSA number. The current person have the number 1,
- Erase evry N° : delete all the SOSA numbers

Internal couple : (Shift-Ctrl-I) creates a family tie between deux persons existing in the data base. The person's card from which the function is called, is one of the spouses.

Complete indexes : (Shift-Ctrl-X) completes persons indexes from the couple indexes. This function is useless after an import.

About Gen5 : (Shift-Ctrl-G) displays the number of persons in the current base, the version number and details on the author,

Help on Gen5 : (Shift-Ctrl-H),

Register : (Shift-Ctrl-R) to register Gen5 and remove any limits.

3 DISPLAY COUPLE

Husband: Philippe DUBOIS	1 : Pierre	M	Update marriage

- Enter : Attributes an order number to the selected child,
- Tab : Validates children order after attributing a number to each of them,
- Esc : Cancel.

Add link : (Shift-Ctrl-A) to add a person already existing in the base to this family (as father, mother or child),

Cut link : (Shift-Ctrl-C) to delete the couple's card et break any link between these persons. However, these persons are not deleted from the base,

Help on Gen5 : (Shift-Ctrl-H)

4 CREATE A PERSON

4.1 Entering person

When you create a person (first person of the data base, parent, spouse or child) you must record as a priority the name, surname and select gender fields.

The screenshot shows a form titled "Update - 1" with the following fields and controls:

Last name:	<input type="text" value="DUBOIS"/>	<input type="button" value="Details"/> Ctrl+D <input type="button" value="Cancelling"/> Esc <input type="button" value="Saving"/> Ctrl+S
First name:	<input type="text" value="Philippe"/>	
Gender m/f:	<input type="text" value="Male"/>	
Born on:	<input type="text" value="15.12.1955"/>	
at	<input type="text" value="Marseille (13)"/>	
Died on:	<input type="text"/>	
at	<input type="text"/>	

Ctrl+D to go to the second data screen,

Esc for cancelling all the modification (first and second screen),

Ctrl+S for saving all the modification (first and second screen).

This action is also available for the second screen.

Philippe DUBOIS	
Denomination:	<input type="text" value="Catholique"/>
Baptized on:	<input type="text" value="03.2.1956"/>
at	<input type="text" value="Marseille"/>
Buried on:	<input type="text"/>
at	<input type="text"/>
Occupation:	<input type="text" value="informatique puis chef de service production"/>
Training:	<input type="text" value="BAC C, Ingénieur"/>
<div><div>Principal Ctrl+P</div><div>Cancelling Esc</div><div>Saving Ctrl+S</div></div>	

4.2 Entering dates

Dates must be included between 1.1.1 and 31.12.2100. Their format is DD.MM.YYYY or MM.DD.YYYY (see your preference on your system screen) or YYYY. Conveniently, it is possible to enter a 0 for a unknown day or month.

You must put a point (.) between day and month and between month and year.

4.3 Entering Notes

The field is limited to 1000 characters. Use the buttons to quit.

5 HOW TO REGISTER

Gen5 is not free, it is shareware. This is a system which allows you to try this product for an evaluation period of one month free of charge. If you want to continue using it after this time you must register your copy.

Registration will remove the nag screens and a family tree will stock thousands of persons against less than thirteen.

Registered users will also be sent upgraded versions of Gen5 free of charge, (except any postage charges for registered users without an e-mail address).

5.1 To register by post mail

To register, you will have to send me your name and address and 15£ or 25\$ cash (no checks please), or 150FF(French cheque or money) and the license code (Shift+Ctrl+R) at:

Michel Catton

31, avenue Charles de Gaulle - P2

95160 MONTMORENCY

FRANCE

e_mail : michel.catton@wanadoo.fr

Please include your e-mail address, postal address and the license code (Shift+Ctrl+R) and which version of Gen5 you are using, and how you know Gen5.

You will then receive the registration instructions and your personal code to enter in the register option.

5.2 To register with credit card on the web

You can also purchase Gen5 on-line with a credit card : 180FF (Web registering costs to me 30FF)
or 1110BEF - 46CAD - 44,5CHF - 54DEM - 27,95EUR - 19GBP - 30,95USD ...

<http://perso.wanadoo.fr/michel.catton/>

with your the license code (Shift+Ctrl+R)

You will then receive by e_mail the registration instructions and your personal code to enter in the register option.
