Introduction

Accordian is a WIndows Solitaire card game.. Accordian is distributed as shareware. You may copy it and give copies away. If you enjoy the game, please send a payment of \$5 (or what you feel it's worth). I would also appreciate comments for future versions.

Procedures

Cards are dealt in a row from left to right. Whenever a card matches its immediate neighbor to the left, or matches the card two away to the left, it may be moved onto that card. Cards match if they are of the same suit or same rank. The selection of the first card is highlighted and a matching card will be removed automatically when clicked upon. A first card may be de-selected by reclicking, the highlighting will disappear. After making a move, look to see if it has made additional moves possible. The game is won if the deck of cards is reduced to one pile.
