

ACCORD.EXE v2.0 "Accordian"

03/31/95

programmed by Philip Bush

This MS Windows solitaire card game is a shareware program.

The game randomly generates a deck of cards that you must attempt to clear. Available cards are "matched" (same suit or same value). The object of play is to clear all of the cards into one pile. A high score list is maintained by the program.

The distribution files are:

ACCORD.EXE

ACCORD.HLP

QCARD.DLL

README.WRI <- this file

QCARD.DLL should be placed in the \WINDOWS\SYSTEM subdirectory. Although, ACCORD.EXE will run if QCARD.DLL is in the same subdirectory as ACCORD or in your PATH. QCARD.DLL is a freeware DLL programmed by Stephen Murphy.

You will also need VBRUN300.DLL. This DLL is required to run programs created by Visual Basic version 3.0. VBRUN300.DLL is commonly available on most bbs's and commercial on-line services (in MSBASIC forum on CompuServe). VBRUN300.DLL also belongs in the \WINDOWS\SYSTEM subdirectory.

If you enjoy this game, the shareware registration fee is \$5.00 (or whatever you feel it is worth). Feel free to pass this game along to others. Comments, with or without the registration fee, are appreciated. The only on-line service that I regularly frequent is Prodigy, WWHH86A (Internet: WWHH86A@PRODIGY.COM). Send a 3.5" floppy disk and postage (or an extra \$1) with a request for the latest version and I will send you the latest plus a number of other games that I have programmed. Without the disk/postage or add'l \$1, I may or may not send you a disk!

Shareware vendors may include this software on disk sets, cd roms, etc... under the following conditions:

- ACCORDIAN v2.0 itself is not being sold (customers paying for duplication, distribution, etc...).
- inform customers that shareware fees are due to the authors of the software.
- the fees are not excessive.
- ACCORD.EXE, ACCORD.HLP, QCARD.DLL, and this file README.WRI are distributed together and in their original unaltered state.
