| | |
|-------------|----------|
| Left arrow | - Left |
| Right arrow | - Right |
| Up arrow | - Up |
| Down arrow | - Down |
| Space bar | - Throw; |

Points on board

The outer thin circle on the dart board is worth double, and the inner triple the point value marked.

The center red circle on board is the bull's eye, 50 points.

Bull's eye is surrounded by the bull (small black circle), 25 points.

Game rules

General

The point value of every thrown dart is subtracted from current score.

The winner is the first player who reach zero. Zero must be reached exactly.

If zero is exceeded in a negative direction, a bust will occur.

If a bust occurs, the score will return to what it was at the start of the round, and the remaining darts of that round will be lost.

Double In/Out

In a double in game, scoring does not begin until a double is hit.

For double out game, You can win only by hitting the correct double.

The player will bust with a score of one in a double out game.

You can play any combination of double in and double out game.

Time Limit

In a time limit game, You schoud throw the dart before time exceeds, if time is exceeded the throw will be done automaticly.

You can change time limit from 3 to 20 seconds.

Time limit game can only be played without computer player.

Computer opponent

In a human vs. Computer game You can choose your computer opponent, and the game must be played one on one.

That means the Player1 is human and the Player2 is Computer.

How to Throw

By pressing the space bar the dart will be thrown.

What the dart is going to hit - depending on hand position, and on how the hand holds the dart.

The dart will fly a bit up or down from current hand position, depending on how the hand holds the dart (dart is showing up or down).
