

1. TZ-Minigolf I V2.0 for Windows

TZ-Minigolf is a very easy and comfortable to play miniature golf simulation including sounds and music. Just drag the mouse pointer to aim the ball and control the strength of your hit. The full version consists of 18 nicely designed levels, unregistered users are restricted to six levels of it. Registration fee is 25 US \$. Works fine with Win95.

2. TZ-Minigolf II for Windows

The expert edition of TZ-Minigolf with really tricky holes for the advanced players. Otherwise like TZ-Minigolf, 6 of 18 holes playable. Registration fee is 25 US\$.

3. TZ-Breakout V2.0 for Windows

TZ-Breakout is a fast and flickerfree gamble-hall style breakout-game where you control a ball with your racket trying to hit stones and goodies. In each level there are three magic stones. If you hit one of them you gain extra points according to the time you needed and one of the three stamps hiding one of the 25 nice cartoons will be stripped off. TZ-Breakout contains speech and music samples and 50 original levels (eight of them playable for unregistered users). Registered users can create their own levels using a very comfortable level-editor. Works well with Win95. Registration fee is 25 US \$. 4 MB RAM needed.

4. TZ-Colony V1.01INT for Windows

Colonize the planet Irata with up to four players at the same time! Decide to produce with hard work or make fast money by speculating. Quick reactions and complex strategies lead to victory in this highly elaborated simulation of a self-supporting group of planetees. Joystick strongly recommended! 4 MB RAM and very fast 486 or Pentium needed. Registration: 25 US \$.

5. TZ-Alien Attack v1.0INT for Windows

No blood, no violence but hot action, great graphics and some very intelligent opponents are responsible for the endless fun in this packing all time favorite shoot them off game. Joystick strongly recommended except for some keyboard artists! 4 MB RAM and very fast 486 or Pentium needed. 50 levels - 8 playable unregistered. Registration: 25 US \$.

6. TZ-Videomaster V1.01INT for Windows

Do you want to control all the movies (*.avi or if your MCI-driver is installed as well: *.mov) of a CD-ROM by just some mouse-clicks or combine the scenes you like the best to a new virtual movie within few minutes?

TZ-Videomaster gives you total control over each picture.

In **play mode** you can open up to 16 videos at the same time, if you like and have the suitable big screen all of them will be shown in their own window. Just click in a movie window and it will start to play (always the movie in the actual window is shown).

In **record mode** you can scratch up to 20 good scenes even from a very bad CD-ROM and combine them to a new virtual movie in whatever way (repeat, loop) or order you like.

Everything is done **by** just some **mouse**-clicks.

Unregistered users can create new virtual movies but not reopen them again, this feature is reserved to the full version. Registration fee: 55 US \$ plus 5 \$ shipping.
