Playing Winjack

Upon starting WinJack will shuffle the deck of cards. Betting must be done before dealing the cards by using the BetBar or entering an amount directly from 0 to 100. After which you may deal the cards. The player then hits until he gets close to 21 with out going over. When the player stands the deal will deal his own hand. The dealer will hit on or below 16 and stand on or above 17. The Bet is automatically added or subtracted from the player's assets.
