

WinRisk Instructions

Description:

WinRisk is a Risk game for 1 to 3 players.

The computer will play the other pieces.

The computer can also play all three sides, but you wont get your computer back for a while!

Instructions:

If you know how to play the board game, this is pretty straightforward.

If you don't know how to play the board game..um..go borrow it.

Differences from the board game:

The map is slightly different

You always roll the maximum allowed number of dice

Card sets are turned in at the beginning of the next turn (you can't hold onto them)

Optional rules:

Card sets give (4,6,8,10,12,14,16...) armies instead of (4,6,8,10,12,15,20,25...)

Maximum of 12 armies per territory

These options are turned on and off in the Options menu.

Mouse:

When its your turn to place or move armies, you can place/move one army with the left button, five armies with the right button, and ten armies with the middle button.

Keyboard:

For those of you with less than three buttons on your mouse, the left, up and right arrows can be substituted for the left, middle, and right mouse buttons.

Systems with no mouse are not supported.

Requires 286 or higher, 640X480 or higher resolution and a mouse.
