MusicBar
version 3.41a

Legal information

- MusicBar is shareware. See the MusicBar.hlp. file for more information.
  - MusicBar is available in it's latest version on http://www.geocities.com/TheTropics/2612/

System requirements

- A PC running Windows 95 or NT 4 or later
  - A sound card. As sound quality will depend on the hardware, a wave table sound card is preferred.

Installation

- Expand all files to a temporary folder.
  - Run the install program (install.exe) to install MusicBar.

How to uninstall

- Open Control Panel's Add/Remove program and select MusicBar from the list. This will delete all MusicBar's files. Remember to exit any running copy of MusicBar before you uninstall the program. Your albums will not be removed by the uninstaller.

What's new?

3.41a   Reworked install program
        Added "How to…" help topic
3.41   Fixed a bug in the shareware information help
        Main EXE a tiny bit smaller and faster loading
3.4   Improved help system with registration guide
        Faster loading
