***STNEWS9Ban is Vol. 9 Issue 1 of _ST News_
(dated March 11, 1994) by Richard Karsmakers, the author of the Ulimate
Virus Killer and more. It is chock full of interesting articles,
software, film, music and book reviews. Assembly Language GEM
programming tutorials, an article by Jeff Minter, an in-depth preview of
Chromastudio 24, lots of "cheats" for adventure games (Time Quest,
Demons Seed, Gold Rush, Hero's Quest II, and more), an article by Atari
Benelux' Wilfred Kilwinger explaining how to get the most from MultiTOS,
information about the latest viruses and letters from a virus
programmer, a fun look at the number "42" and several interesting
programs. This is JAM packed with material and I recommend it to you.
Color. ST-TT(in ST res)-Falcon and Geneva (but not MultiTOS)
compatible. You can run this magazine from two double-sided disks if
you wish, or place it all into one folder on a hard drive (recommended).
