Copyright & legal stuff

### 1.3 Copyright & legal stuff

UpdateCT.rexx is © Stephan Sürken.  
CD2M2.rexx is © Stephan Sürken.

Both scripts are PUBLIC DOMAIN, that means you may copy and use it freely.

Sure I am not responsible for any damages the scripts might do.

For any comments, bug reports or similar stuff, contact me (see The Author).

Note the following:

- o If you copy it, you MUST copy the whole original archive.
- o You may include this copy on any Public Domain Series, but you MUST NOT include it on any disk that is sold for more than 5 US Dollar (or an equivalent in other currencies).

- o The program must neither be used nor copied by any right wing organisations or persons.

## 1.4 Documentation

This package delivers a CLI-tool for updating catalog translation files due to a new catalog description file (UpdateCT.rexx), and additionally a CLI-tool to create a Modula-2 source code file out of a description file.

Both tools are realized as AREXX scripts. They are made for usage by programmers only.

Please note:

- o the output file is overwritten automatically
- o UpdateCT can't update a translation file to the same translation file; you will always have to produce a new file (see example batch file UpdateCT.deutsch).
- o UpdateCT REQUIRES the ct-input, even if you did not yet write one. Simply create a empty file for this first usage; doing that, you must include the language command into the created initial ct-file by hand.

Syntax:

```
rx UpdateCT <cd-file> <old-ct-file> <output-ct-file>
rx CD2M2 <cd-file> <output-def-source> <output-mod-source>
```

Please read the comments in the files for documentation!!!!

P.S.:

~~~~~

Is there anyone out there who knows why OpenCatalog does not work with M2Amiga 4.2 ??

If I deliver the "version" tag, no catalog will be opened at all.

If I deliver no "version" tag (or setting it to zero), the catalog will be loaded all right, but the version & revision values of the opened catalog are rubbish.

WHY????????!!!!!!!

1.5 The Author

The author is me and I am the author.
