

## **Why register?**

YENCO.COM is a small shareware company. We work very hard creating some really great Macintosh-only software and providing support for our users. We really enjoy what we do and, if we could, we would gladly do this for free. Unfortunately, like everyone else, we have bills to pay. So unless we're lucky enough to win the lottery, or some philanthropic individual or organization reading this has massive amounts of money they wish to send our way, we have to charge a small registration fee for our products.

Your payment helps to support YENCO.COM. It ensures that we remain in business and this product continues to be developed. In short, we can't do this without you. Registration also lets you continue using this software beyond the free evaluation period and entitles you to free updates, support and future upgrade offers.
