F-Script 1.3.4 *freeware*

Philippe Mougin, <http://www.fscript.org>

Requirements: Mac OS 10.3 or later

F-Script is a lightweight open-source scripting layer specifically designed for the Mac OS X object system (i.e., Cocoa). F-Script provides scripting and interactive access to Cocoa frameworks and custom Objective-C objects. It aims to be a useful and fun tool for both beginners and experts, allowing interactive exploring, testing, and using Cocoa-based objects and frameworks.

Zinc 2.5.0.14 *trial*

Multimedia, <http://www.multimedia.com>

Requirements: Mac OS 10.2 or later

Zinc for Mac OS X empowers your Macromedia 6, 7, and 8 SWF files with unrivaled functionality and flexibility. Create powerful desktop applications for OS X with over 150 new and extremely powerful commands for your Flash projects.
