Kickstart 3.x

picture.datatype 43.x

PhotoAlbum is Copyright 1996-1998 by Helmut Hoffmann

1.2 Disclaimer

Disclaimer

proof.datatype and its associated files are supposed to enable proofs generated with proof.library to be loaded using the V43 picture.datatype. Even though every effort has been made to make proof.datatype as stable and functional as possible, I cannot rule out the possibility that proof.datatype may have bugs that have side effects (possibly harmful) on your system.

I hereby reject any liability or responsibility for these or any other consequences from the use of proof.datatype whatsoever. This includes, but is not limited to, damage to your equipment, to your data, personal

injuries, financial loss or any other kinds of side effects.

proof.datatype is provided as-is. This means I do not guarantee that proof.datatype is fit for any specific purpose and I do not guarantee any bug fixes, updates or help during error recovery.

1.3 Distribution

Distribution

Distribution

proof.datatype should be distributed at no charge to the end user. It may be included on CDs such as Fish and Aminet. The proof.datatype executable and documentation is shareware, however payment is not required for its use.

For ANY commercial application using proof.datatype, contact the **author** for further information concerning distribution.

1.4 Installation

Installation

Copy

Classes/Datatypes/proof.datatype to SYS:Classes/Datatypes

Devs/Datatypes/Proof to Devs:Datatypes

Devs/Datatypes/Proof.info to Devs:Datatypes

and if you want PhotoAlbum (jpeg only) thumbnails

Devs/Datatypes/PhotoAlbum-JPEG to Devs:Datatypes

Devs/Datatypes/PhotoAlbum-JPEG.info to Devs:Datatypes

1.5 What it loads

proof.datatype loads files created with proof.library into any V43 picture.datatype aware application.

If you use the PhotoAlbum-JPEG descriptor, you can also load PhotoAlbum created thumbnails stored with a jpeg stream.

1.6 Compiler

Compiler

proof.datatype was written and compiled using CED V3.5 and SAS/C 6.55 on an Amiga 4000/060. Cyberguard was used to detect/correct programming errors.
