1.2 Description

Discription

With this tool, you can restore files on PFS3 and PFS2 formatted drives.

Simple doubleclick the device to get the .deldir list of this device. Doubleclick the files you want to restore. If you have selected all files you want to restore, so click on the Restore button and you'll find all files in the selected Destination. If you did a mistake, just doubleclick the file in the List to remove it. In the Direct Mode, the files are directly on selection restored.

1.3 Installation

Installation

Install the program wherever you want.

1.4 Problems

Problems

1 If you have the PFS3 standartversion installed (TD64) and have a larg deldir list or larg files in the deldir list, your machine sometimes lockup. This is not an error of my program, it is an error from PFS3 (TD64). I have tried to salv the problem and I have found a way: Just install the PFS3ds (direct scsi) version and all works fine!

2 If you have larg deldir list or larg files in the deldir list, the reading take time. Thats normal. Also to undelete a big file needs some time.

1.5 FAQ

FAQ

Q: Why is the Blocksnumber 0? A: First you have to get the setdeldir-exe in the PFS3ud.

Q: I've graphical errors in the Lists! A: You're using an unproportional font. Use proportional fonts.

Q: The window looks different between PFS2/PFS3 and DirectMode. Is this normal? A: Yes. Unsupported tools in PFS2- and DirectMode are removed.

1.6 Menu

Menu

Project About Prints information about the program.

Project Quit Quit the program.

Use Set Deldir Open a Requester to set the deldirblocks of a device.

Use Clear Deldir Remove all files from .deldir list.

Use Get setdeldir Get the setdeldir-exe.

Use Get Source Read the Sourcedevices.

Use Get Destination Read the Destinationlist.

Use Get .deldir Get the deldir list of the selected device in the Source list.

Use Restore Restore the Files from the List in the selected device from the destination list.

Settings Remove Number If selected all numbers from PFS3 are removed from the filename.

Settings No Multiselect If activated, you can't select the same file several times.

Settings PFS Detection If enabled only PFS devices with a .deldir list are shown in the source list.

Settings Direct Mode If enabled, all doubleclicket files are restored immediately.

Settings PFS Mode Select the operationmode of PFS3ud. Select the right one of your PFS Version (PFS2 or PFS3).

Settings Sort by: List the .deldir/ list sorted by name or by age.

Settings Load Settings Load the settings.

Settings Save Settings Save the settings.

1.7 Special

Special:

Restoring of a full .deldir list of a device: Keep the list of the files to undelet clear and press Restore. After this, all files of the selected Source device are restored in the Destination device.

1.8 History

History

25.11.1999 PFS3ud V 1.0 First release.

1.12.1999 PFS3ud V1.1 Problem with PFS TD64. See [Problems](#) for info. Bug fixed for reading non PFS devices. Now programstatus is displayed below the deldir list.

5.12.1999 PFS3ud V1.2 Not released testversion. This version is only for test the PFS3 device selection. Filename correction of restored files implemented. First Beta version.

10.12.1999 PFS3ud V1.3 Release now all the features which are included in the version 1.2. They work all now.

New: - Only PFS devices are displayed in the source device. - Only valid devices are displayed in the destination device. - The extension number of restored files are now removed.

15.12.1999 PFS3ud V1.3a This version isn't released in the AmiNET. Only the docs have changed. History now in the documentation.

23.12.1999 PFS3ud V 1.4 New: - Now you have to create an undelete list. This list allows you to undelete files from different devices with one click. Restoring of files with a space-char did not work. Fixed. Some User told me, that PFS3ud works fine with PFS2. Thanks to them for report.

7.1.2000 PFS3ud V 1.5 Font from undelete list corrected.

4.3.2000 PFS3ud V 2.0 Compiled with new Compiler version. Window position will be saved. Change the deleted blocks with PFS3ud. New Menu design: - PFS Detection - Direct Mode - PFS2 / PFS3 Mode Clear the deleted blocks.

18.3.2000 PFS3ud V 2.1 The name of all restored files is now correct. Full list restore now easy possible.

24.4.2000 PFS3ud V 2.2 Configure the deleted blocks was only possible before reading a deleted list. Fixed. Now, all program functions are in one Window.

7.5.2000 PFS3ud V 2.3 The Version and the Date in the About-window were wrong. Fixed. Little problem with the window position fixed.

8.5.2000 PFS3ud V 2.4

Now with graphics buttons. Colour and Font now taken from Workbench. Window is now smaller, works now also with HiRES-Screens. Graphic in the window changed. Restore of full devices always works now. Erase of the numbers from PFS is now settable. Multiselect of Files is now preventable. Sorting of the .deleted list is now possible by name or age.

15.5.2000 PFS3ud V 2.5 New: Automatical search about the setdeleted-exe. Unsupported tools in PFS2 and DirectMode are removed from the window in the actual modes.

23.5.2000 PFS3ud V 2.6 beta Only changes in the program to find a bug.

25.5.2000 PFS3ud V 2.6 New routine to read the source and destination devices. Faster and more compatible.

19.11.2000 PFS3ud V 2.6a Only changes in the documentation.

5.12.2000 PFS3ud V 2.6b Only changes in the documentation.

4.6.2001 PFS3ud V 2.7 Fixed a bug in PFS-Detection.

15.7.2001 PFS3ud V 2.8 Fixed a bug in the remove number feature. It works now how the menu is set. Changed the look of the GUI. It's now possible to select the destination directory directly. Change in the source. Now the program is a little bit faster.
