DON'T-BLAME-ME-WARE, I wrote this thing for my own use...

WHAT IT IS: A File Launcher

WHY YOU NEED IT:

Written with Blitz Basic II	It dosen't take up much screen room
Tooltype prefs.	Upto 100 gadgets (if your screen's big enough)
It's written by *ME*	If an icon is found for a program it's run with wblaunch else its run from cli
It's easy to configure	Drag'n'drop onto prefs window
Nice scrolling effect	

NEW FOR VERSION 3:

Up to 16 menus	Only uses 10% of the memory of previous versions
Menu control for prefs	Delete entries by hilighting them and pressing DEL
Quit gadget on left side	Menu data stored in ENVARC: & ENV: instead of icon
More scrolling options	Now has a shadow option (See Snapshot)

DEVELOPED ON: A4000, Cyberstorm 060/50, 82Mb Ram, Picasso IV + Picasso96, Blitz Basic 2.1
