1.1 MP3-TagED v2.5

MP3-TagED v2.5

Copyright © 1998-1999 Christian Vigård

MP3-TagED is released as **EMAILWARE**

MP3-TagED v2.3 was cracked :- (if you are using a cracked **keyfile** then please delete it and get one from the author instead, or this may be the last version.

I'm doing my military service right now so I don't have much time over to code on MP3-TagED. So this is not the complete v2.5 - it has some new features such as Export output is now configurable and Write all loaded files can be done.

!! This is BETA version !! New features is not documented yet.

-- I want **icons** to use with the program --

Introduction

Description What is "MP3-TagED" ? **System Requirements** What you need to use the program. **Features** Features list. **KeyFile** You'll need a keyfile (Free).

Distribution

Disclamer Read this!!

Installation

How to Install MP3-TagED Installation procedure.

How to use MP3-TagED

Windows How to control MP3-TagED **Menus** Pull-Down Menus. **Arguments (CLI)** Start MP3-TagED with arguments. **ToolTypes (WB)** How to set tooltypes.

Miscellaneous

1.2 Description

Description

MP3-TagED is a GUI-based program to Add/Edit/Remove ID3 TAG in MPEG Audio Files.

See **history** for all the new functions added.

1.3 System Requirements

System Requirements

- Requires at least kickstart v2.04+
- [gtLayout.library](#) v40+
- [reqtools.library](#) v38+
- [popupmenu.library](#) v8+
- A keyfile to use the program to 100% - it's **FREE**.

This program has been tested successfully on the following configurations:

- A1200/030 50Mhz 32Mb RAM 1.4Gb HD 8xCD-ROM 1084 C= Monitor ([Complete List](#))
- A4000/060 50Mhz 64Mb RAM ([Complete List](#))

1.4 Features

Features

- Read/Write/Delete MP3 TAG.
- Multiple file support.
- Can be opened on any public screen.
- AppWindow/AppIcon (Drag 'n' Drop).
- Read files at startup.
- Appears as a Commodity.
- Make filename from ID3 TAG (Configurable).
- Rename files through program.
- Configurable filecomment.
- Export TAG information to ASCII/Amigaguide/SongPlayer PlayList.
- Fresh Genre List (sorted).
- Copy MP3-Tag to all loaded files.
- MP3 Header Information.
- Default ID3-TAG displayed if MP3 file hasn't got a TAG (configurable).
- Genre statistics.
- Import SongPlayer/AmigaAMP/Amplifier PlayLists.

1.5 Disclaimer

Disclaimer

This package can be freely distributed as long as:

1. It is not sold; only a reasonable charge for copying and storage medium is allowed.
2. All of the following files are included in their original form without modification of any kind.

MP3-TagED is released as **EMAILWARE** please respect it!

Permission is hereby granted to include `MP3-TagED` in PD compilations such as Fred Fish or Aminet CD.

You may include this archive on any Magazine CoverDisk/CD-ROM, as long as you contact me (through e-mail) and send me a copy of the magazine. See **Last Words**.

Use `MP3-TagED v2.5` at your own risk.

The Author, Christian Vigård takes no responsibility at all, for whatever may happen you or your software/hardware caused by any of the files containing in this package.

1.6 How to get a free KeyFile

How to get a FREE KeyFile

There is no excuse not to register this program if you use it. It's 100% FREE and to get a keyfile just e-mail the **Author** and don't forget to include your name.

Q: Why do I need a keyfile ?

A: Keyfile has been added for one single reason, and it is to see how many people using this program.

Limits without keyfile

The program is fully functional except for 3 things.

You can't use the "Read" "Write" "Delete" functions in main window.

I've noticed a cracked version of MP3-TagED v2.3 (cracked by zIgUS/FTN) If you are using a cracked keyfile then please delete it and get one from the author instead, or else this may be the last version.

1.7 How to install

How To Install

Click on the installer icon to start the installation.

You can also do the installation manually:

1. Copy **reqtools.library** to Libs:
2. Copy **gtlayout.library** to Libs:
3. Copy **popupmenu.library** to Libs:
4. Copy the rest off the files to where-ever-you-want.
5. The program will look for the keyfile in PROGDIR:

Description

Show Computer Configuration/Bug Reporter.

Requirements

· identify.library · gtlayout.library · textfield.gadget · reqtools.library

Features

· Program have a font-sensitive user interface. · Can be opened on any public Screen. · Has a Bug Report Editor built-in. · Attaches itself to Tools-Menu (AppMenuItem). · Appears as a Commodity. · Easy-to-Use

Download / Aminet

util/misc/WCv14.lha

1.13 History

History

- v1.0 First Aminet release.
- v2.0 Second Aminet release.
- UPDATE- Total rewrite of program.
- UPDATE- Bugfixes, new functions.
- v2.1 Third Aminet release.
- ADDED- MP3 Header Information (BitRate, Frequency, etc).
- ADDED- Iconify support (Drag 'n' Drop) files.
- ADDED- Menu items that can't be used at the moment is now disabled.
- ADDED- Default MP3 TAG (explained in [Default Tag Window](#)
- ADDED- "Copy Tag Fields" (explained in [Copy Tag Fields Window](#)
- BUGFIX- Rename function was not working properly (fixed).
- UPDATE- More fields added to "Comment Format".
- UPDATE- Removed the `Use` button prefs window.
- UPDATE- Lot's of changes in source code (cleaning up etc).
- v2.2 Fourth Aminet release.
- ADDED- MenuItem Sort (sort main list by (FileName/Artist/SongName/Album/FileSize).
- ADDED- [Status Window](#) (Total duration,total filesize, etc).
- ADDED- [Genre Status Window](#), Create list over all used genres (and unused).
- ADDED- Default TAG is now optional.
- ADDED- [KeyFile Protection](#) (Remeber keyfile is free).
- CHANGE- Default TAG can now only be saved from Prefs window.
- CHANGE- Removed MPEG Information window and replaced it with reqtools-requester.

- CHANGE- Code changes, source is now split up in even more files.
- CHANGE- Cosmetic changes made to **prefs window**.
- CHANGE- Prefsfile structure changed... make a new one :-)
- CHANGE- Rewrote some parts of the Argument parser code.
- BUGFIX- Forgot to free memory when pressing "Remove" button in main window.
- BUGFIX- Fixed some errors in this guide file (there are probably more errors).
- v2.3 Fifth Aminet release.
- ADDED- Finally managed to write an installer script! :-)
- ADDED- I've also added one (!) icon to the program. (by me).
- ADDED- Added Genre button to Default TAG.
- ADDED- Added Import Playlist (Songplayer/AmigaAMP/Amplifier).
- ADDED- Added **popupmenu.library**..
- CHANGE- "Tag To FileName" window is now removed and replaced with a **popupmenu**.
- CHANGE- "Comment Format" window is now removed and replaced with a **popupmenu**.
- ADDED- Added possibility to load playlist at startup.
- ADDED- Added **Argument/ToolType** SKIPPLST
- ADDED- Added **Known Bugs** section to MP3-TagED.guide.
- BUGFIX- "Make FileName From TAG" and "Rename" didn't work correctly. Forbidden characters will be corrected automatically.
- CHANGE- Cosmetic change made to **Status Window**. (Listview removed and replaced with a gtlayout specific button).
- CHANGE- Start button in "Copy Tag Fields" window is now Disabled if no fields are marked.
- BUGFIX- Sort fileNames function was not working correctly. If files from different drawer was loaded the filenames wasn't sorted correctly.
- CHANGE- Replaced "Information" requester with a window (AGAIN!). The main reason this is that you can have the window open and browse the loaded files at the same time. (The Information will be updated when you select a file).
- ADDED- Preferences is available for the **Information window** position.
- v2.5 Sixth Aminet release.
- BUGFIX- Tag To FileName wasn't working correctly. The Space To Underscore option was ON all the time.
Reported by: Matt Sawyer (Thanks!)
- ADDED- Percentage now shows in Genre Status.
- ADDED- Pressing Add in MainWindow will make a popup menu appear with Files/Directory.
- ADDED- Add files by directory.
- CHANGE- Removed SongPlayer/Amplifier/AmigaAMP menuitems, they are now replaced with "Load PlayList".
All lists can be loaded anyway. -ADDED- Pressing TAB when Information Window is open will MP3-TagED shift between Main- and Informationwindow.
- ADDED- Information Window MenuItem is now disabled when Information Window is open.

1.14 ToDo List

ToDo List

- Add support for Locale.
- Your Ideas!

1.15 Credits

Credits

- Olaf `Olsen' Barthel - Author of [gtlayout.library](#).
- Nico Francois & Magnus Holmgren - Authors of [reqtools.library](#).
- Henrik Isaksson - Author of [popupmenu.library](#).
- Mark Ritter / Paul Huxman - Thanks for all help with gtlayout.
- Tobias Persson - BETA-Tester + lot's of useful ideas.
- Christian Nilsson - BETA-Tester + lot's of useful ideas.
- Daniel "Bejron" Andersson - Thanks for testing and your ideas.
- Kirt Strauser - Thanks for testing and your ideas.
- Fredrik Rambris - Thanks for the MPEG Header Info Code.
- Matt Sawyer - Thanks for the bugreport.
- Edd Dumbill - Thanks for writing the best AmigaGuide creator utility.
- All Registered Users - Without them this version wouldn't exist!!
- Metallica / HammerFall / Mortum - Thanks for your great music.

E-MAIL: vigard@hem2.passagen.se ICQ: 13509476 IRC: vIGGE @ #AmigaSWE / #Amiga.SE (IRCNet)

/Greetings Christian Vigård

(If you want a keyfile than please use "MP3-TagED v2.5 - KeyFile" as subject).

1.17 Request From Author

Request From Author

- ICONS

I want Icons to use with the MP3-TagED package (both in MagicWB/NewIcons style).

If you want to help me with this then please [email](#) me.

1.18 Last Words

Last Words

My english isn't the best because my native language is Swedish. So if you don't understand this text - sorry :).

If a magazine wishes to put this archive on their disk, I must be notified and granted a free copy of the issue. Usually the Amiga magazines don't even bother to send you an e-mail when they use your work on their disks, they don't even bother to mention your name. That STINKS!

· Ok

Use selected genre.

· Cancel

Cancel any changes you have made.

Hint

You can use the cursorkeys to go up and down in the Genre window list.

1.49 DeleteWindow

Delete Window

This window will ask you if you want to delete the ID3-TAG in the selected file.

· Yes

Delete the ID3-TAG.

· No

(Abort) Close Window.

1.50 RenameWindow

Rename Window

· Rename

Current filename.

· As

New filename.

· Okay

Rename file.

· Cancel

Abort...

1.51 InformationWindow

Information Window

This window will show some information about the MP3 file you've selected.

The information you will get is:

- ID - Layer - BitRate - Frequency - Mode - Length - FrameSize

· Close

Close window and continue.

1.52 CopyTagWindow

Copy Tag Window

- SongName

Select `SongName` and the program will copy it to all other loaded MPEG Audio files.

- Artist

Select `Artist` and the program will copy it to all other loaded MPEG Audio files.

- Album

Select `Album` and the program will copy it to all other loaded MPEG Audio files.

- Year

Select `Year` and the program will copy it to all other loaded MPEG Audio files.

- Comment

Select `Comment` and the program will copy it to all other loaded MPEG Audio files.

- Start

Write loaded ID3-TAG to all other loaded files. The program will start at top and write the ID3-TAG to all your files, it doesn't matter if you select the last file all other files will have the same ID3-TAG anyway.

- Cancel

Cancel any changes you have made.

1.53 DefaultTagWindow

Default Tag Window

This window is used to let you have your own Default ID3-TAG. So if a file doesn't have a ID3-TAG then the text you write in this window will appear as ID3-TAG in main window.

- SongName

Default `SongName` TAG.

- Artist

Default `Artist` TAG.

- Album

Default `Album` TAG.

- Year

Default `Year` TAG.

- Comment

Default `Comment` TAG.

- Genre

Default `Genre` TAG.

- Use

Use new settings (this will only work if you save the config in Preferences window).

- Cancel

Cancel any changes you have made.

1.54 Information Window SetUp

Information Window SetUp

Preferences window for **Information window**.

- Window Position

- Center

Center information window on public screen.

- Define

Define your own position for Information window.

- Left

Left edge Information window.

- Top

Top edge Information window.

- Use

Use settings.

- Test

Where will the window popup (you decide :)

- Cancel

Cancel any changes you have made.

1.55 Status Window

Status Window

This window will show:

- Loaded File(s) - Total Size - Total duration (HH:MM:SS) - File(s) with TAG

- Save

Save the information to a file.

- Genre

Genre Statistics **Genre Status Window**

- Close

Close `Status` window.

1.56 Genre Status Window

Genre Status Window

This window will show a list with all genres and how many mp3's using a genre item.

Example:

-UNSET- 4 <-- 4 loaded files has -UNSET- as genre. A Capella 0 <-- 0 loaded files has A Capella as genre. Acid 27 <-- 27 loaded files has Acid as genre. Acid Jazz 0 Acid Punk 0 Acoustic 4 <-- Etc...

- Save

Save the information to a file.

- Close

Close `Genre Status` window.

1.57 EMAILWARE

EMAILWARE

MP3-TAGED IS RELEASED AS EMAILWARE. THIS MEANS IF YOU USE IT, YOU'LL HAVE TO **SEND** ME AN E-MAIL. I HAVE PUT ALOT OF TIME AND EFFORT INTO THIS PROJECT, SO THE LEAST YOU CAN DO IS SEND ME AN E-MAIL. TO USE THIS PROGRAM TO 100% YOU NEED TO **REGISTER**
WANT TO PUT THIS ARCHIVE ON A MAGAZINE DISK ? FIRST OF ALL READ **Disclaimer**
