1.2 description

Amiga Crossword Deluxe is as you've probably noticed a crossword game.
The game has the following features:

- * Supports the 'Across Lite' puzzle file format.
- * System-friendly user interface, runs on the workbench screen.
- * Freeware.

Please let me know if you use this game.
I've put a lot of work into this program and only continue its development
if i get some feedback.

You can send a email or a postcard or register online on my homepage:
<http://www.cybercomm.nl/~coenradi>

On the site of Literate Software <http://www.litsoft.com> you find a puzzle gallery and links to other across lite puzzle web sites.

1.3 requirements

Requirements:

Amiga Crossword Deluxe works on any Amiga with Workbench 3.0 or higher.
The game requires the Reqtools.library
A screenmode of 640x480 or higher is recommended.

1.4 install

Installation:

Use the installer script supplied with this game.
No files will be copied into your system directories.

If you want to install it manually - just copy the ACD drawer wherever you want.

To deinstall Crossword_Deluxe just delete the ACD drawer.

1.5 spel

Usage:

You can start the game from the Workbench and Shell.
If you start the game without puzzle parameters a requester will appear and ask ←
for a puzzle.

Click on a square to highlight the corresponding clue.
Click on the square again to switch the direction.
Click on an Across or Down clue to highlight the corresponding squares.
Use the Backspace or Deletekey to erase letters.

 - Some cosmetic corrections.
- 2.1-2.4 Some bugs fixed.
- 2.5 Improved puzzle scroller.
 - Removed vertical centering bug.
 - Added WINWIDTH & WINHEIGHT tooltype.
 - Added BLACK & WHITE tooltype.

1.8 faq

Frequently asked questions:

Q: Why is the puzzle not black & white?

A: ACD uses the first four colours from the workbench palette.

(Gray, Black, White, Blue)

With the tooltype BLACK=1 you can choose another pen for the black colour.

With the tooltype WHITE=2 you can choose another pen for the white colour.

Q: Is it possible to change the size of the game window?

A: With the tooltypes WINWIDTH & WINHEIGHT you can set the max window size.

As default the max window size is the same as the size of your Workbench screen. ↔
