## 002feeb8-0

### 1.1 GMSuite

GMSuite v5.3

(c) Gian Maria Calzolari, 1999-2000  
gcalzo@geocities.com

Introduction

Installation

Acknowledgements

Distribution

History

Note that v5 is the first Aminet upload! I've started from 5 only because some of these scripts were originally created for the great Fidonet mailer EMS and I've kept their original version! :-)

### 1.2 Introduction

Introduction

These are some usefull, at least for me! :-) scripts for the Thor message system.

Currently the suite is made by the following scripts, developed and tested on Thor v2.6.

GMAutoWrite will automatically create email events at specified intervals: either every N days or every day N!

---

GMSignature will let you add an external file as message signature and execute an external program to create the tag!

GMCleanConf is an enhancement to BBSREAD arexx cmd PackDataFile: before executing it messages can be saved to disk with a nice filename and a nice header using GMarchive! :-) Selection is done by month and year.

GMarchive I wasn't satisfied of the currently available message saving scripts so I've wrote mine and I've wrote it to allow use from both Thor's ARExx menu and from another script.

Of course they need to be correctly installed and configured before you can use them. For the configuration please see their respective documentation.

## 1.3 Installation

### Installation

Simply copy the following directories in the right place!

- 1) Copy Docs to <ThorPath>/Docs
- 2) Copy Rexx to <ThorPath>/rexx
- 3) Copy envarc to both Env: and EnvArc:
- 4) Create/Modify the configuration files in Env: and EnvArc: as needed  
Currently:  
Thor/GMAutoWrite.cfg  
Thor/Internet\_S.cfg (it must be renamed to your System name!)  
Thor/Internet\_C.cfg (it must be renamed to your System name!)

<ThorPath> is the directory containing Thor itself.

## 1.4 Acknowledgements

### Acknowledgements

I must thanks at least these two guys! :-)

Neil Bothwick, to let me use his wonderful AutoReply.br as a kind of a master when converting the old GMAutoWrite to be used with Thor. Actually this guide too was written starting from AutoReply.guide...

Simone "Wiz" Tellini, to have created programs such STFax and Contact Manager

---

and for giving me a free key! :-) Simone, I'll keep you "forced" on following my suggestions for STFax! ;-)

### Feedback

Thanks to Kimme Utsi for suggesting the day-of-the-month option in GMAutoWrite.thor

## 1.5 Distribution

### Distribution

GMsuite is freely distributable, but remains (c) Gian Maria Calzolari, 1999.

It may not be included in any commercial distribution without prior consent. Such consent is already given to include it on the Aminet CDs.

It may be included on magazine cover disks or CDs, provided notification is sent beforehand. A copy of the magazine and disk would be most welcome.

Of course the single scripts cannot be distributed, only the complete package can be!

Please sent bug reports, suggestions and eventually cash :-) to me at <mailto:gcalzo@geocities.com>

Even a simple "hey, I'm using this wonderfull scripts" is welcome! :-)

If you like traveling you may want to have a look at mine web pages about MotorCycle Travels! <http://www.geocities.com/TheTropics/Paradise/6362/>

Note: my snail-mail address will be eventually given by private mail... :-)

## 1.6 History

### History

23 Jan 2000 : 5.3 : To avoid unwanted "deadlock" the needed "signal on" routines have been created in GMCleanConf

07 Jan 2000 : 5.2 : Used ReadArguments in GMsignature to avoid errors when crossposting news

21 Dec 1999 : 5.1 : Added CC: and BCC: headers to GMAutoWrite

17 Nov 1999 : 5.0 : First Aminet release! I've started from 5 only because some of these scripts were originally created for the

---

---

great Fidonet mailer EMS and I've kept their original  
version! :-)

15 Nov 1999 : 1.1 : Completed with GMCleanConf

08 Nov 1999 : 1.0 : First release...

---
