

1. Content for the CD is: hyperceive demonstration version, Cool Edit 96 shareware that ships with hyperceive retail version.
2. For publication words please see separate document. Otherwise, the demo version of hyperceive is the same as the retail version but with SAVE and PUBLISH functions disabled. The SAVE function enables the arrangements to be saved and re-opened/re-worked. The PUBLISH function works as an additional area to the SAVE function and produces a web page with all the hyperceive elements embedded.
3. James Booth, Director, INSIGMA Technologies, PO Box 60, Cirencester GL7 5ZE Tel: 01285 643100 Fax: 01285 643600 e-mail jbooth@insigma.com.
4. Minimum system requirements: Pentium 120, 16 Megs RAM, 10 meg HD, Multimedia sound card, PC speakers, Win 95, Win 98, Win NT
5. Full Uninstall Details
Hyperceive demo will uninstall all program files cleanly using the normal Windows uninstall system (Control Panel -> Add/Remove Programs). This will, however, leave the user preferences file, any backup files which the user has not recovered or deleted, and occasionally a small registration file. These typically take up 1-2K, and may be deleted if required; all three are stored in the program install directory (default: C:\Program Files\Insigma Technologies\Hyperceive demo\).
6. Screenshots included
7. Technical Requirements.
No specific requirements; the demo is supplied as a self-extracting binary, produced using Package ForTheWeb by InstallShield. The manual is included as a PDF file for Acrobat Reader. For technical support: jbooth@insigma.com or dj@insigma.com
