Managing Fonts!

tarting version 5.3, user is able to preview, enable and disable fonts using Extension Overload without without going to the Font folder. To manage fonts! User will have to click the 'Fonts' at the main windows. A Fonts window will appear which look like this.

ou can sort the Fonts by each information item simply by clicking the appropriate column header - much like in the Finder of Mac OS 8. For example, to sort by version, click on the Version column header. To change the sort direction (i.e. ascending or descending), click the triangular shape at the upper right corner of the list.

To view the font, click on its name in the list. This displays its icon, kind, created and modified dates and its location in the middle section of the window. The typeface of the font will be display at the botton of the window in '1234567890' and 'The quick brown fox jumped over the lazy dog.' When you are done activating or deactivating the fonts, click Done to close the window.
