

Key names

This is taken from the Frame Developer's Kit chapter included in the `ConfigUI` set of files, which may be found on the `ftp.frame.com` site. This is a series of configuration files that allows one to modify the shortcuts and menus of FrameMaker.

It is therefore copyrighted to Frame, and I hope they do not take me to task for placing it for public distribution.

If you find any errors or omissions (two sins of which I am frequently guilty), let me know: `wilkins@wehi.edu.au`

John Wilkins
