TransEdit 3.05 — Release Notes

This document is an adjunct to the TransEdit Programmer's Manual. It lists changes and additions specific to release 3.05. If you have only programmed with pre-3.0 releases of TransEdit, be sure to read any earlier 3.XX release notes as well.

- This release is updated to be compatible with the TransSkel 3.11 interface, which uses Pascal bindings for the interface functions.

- The TransEdit interface itself is now Pascal compatible. This has some implications for existing applications using pre-3.05 releases, in that if you pass callback functions to `SetEWindowProcs()`, the functions must now be declared as a `pascal` functions.

- Translated the TinyEdit demonstration application to Pascal.
