

Off-Line Documentation template:

1) Operational Goals

task spec

2) Fundamental, "key", or cornerstone architectural requirements (POSTMORTEM)

structured analysis from a supper high level

2.5) Key abstractions involved with the implementation of these key requirements (when applicable)

provide the language for the problem domain

3) Language independent Model of the implementation fulfilling these key requirements (POSTMORTEM)

explain the design

3.5) Explain roles of the Key abstractions USED or IMPLEMENTED in the model (when applicable)

explain the OOD

4) Impact/scope of the implementation on the existing body of code (POSTMORTEM)

5) Coding notes (gotchas, warnings, process thoughts, items to revisited later...)

6) Testing notes(bug types, what made a bug hard to fix, what could have been done to catch it sooner....)

7) Process notes (what process did you follow, could it be improved)
