Apple and Help Menu

Apple ( ) Menu

• About MacPattern…

This command tells you what version of MacPattern you are using and shows the copyright notice. A mouse click or any keystroke ends the display.

• MacPattern Help… (or Help key on extended keyboard)

This item activates the MacPattern on-line help facility. Its use should be fairly obvious. (Technical information: MacPattern Help is based on the MTH routines by J. Pillera published in MacTutor January 1990.)

Help Menu

If you are running System 7, the Help menu contains a copy of the MacPattern Help command.

Use Show Balloons to turn on Balloon Help for most menus and dialogs of MacPattern.
