Limitations

- The pattern/blocks database must not have more than 10,000 entries (but several databases can be used simultaneously).

- Patterns may consist of up to 50 positions (see help topic 'PROSITE Pattern Syntax') or 512 characters in total.

- Up to eight entry sets can be created. Names of sets may have up to 15 characters.

- Sequences must not be longer than 30,000 residues.

- The maximum number of pattern hits per sequence is 2000.

- A maximum of 10 windows (+ one sequence window) can be open at a time.

- Only 32K of data can be displayed in the "results window". Longer output will be saved to disk.
