## Hotlist & Image Library

Hotlist (URL List)
Any URLs listed here will be appended to the URL PopUp Menu, from where they can be used by the Anchor Utility to create hypertext links.

Image Library
This is the text field used to store full or partial URL references to graphic documents (usually GIF or JPEG format) used by the Image Utility. The Add button allows selection of graphic files for inclusion in the list.

Back to Preferences, on to Limitations, or return to Contents.
