TommySoftware® Cloaking Device Version 1.10

Following a listing of files that should be contained on the disks of any TommySoftware® Cloaking Device package (or in the archive created from those disks). If your package does miss any of these files, please contact your local TommySoftware® partner in order to receive a complete package.

Contents of all Disks / Archives:

FILE_ID.DIZ
INSTALL.EXE
INSTALL.WRI
OMBUDSMN.ASP
PACKING.WRI
SHAREWAR.WRI
VENDOR.WRI

Plus a number of files having a numeric value as file name (_000000_ , _000010_ , _000020_, etc.) and some disk indentification files (_DISK01_ , _DISK02_ etc.). The total number of these files varies from 10 to 20, depending on the version and the disk capacity.

When downloading TommySoftware® Cloaking Device from a bulletin board, you should receive a file named TSC110E.ZIP which contains the files listed above.
