TommySoftware® Cloaking Device Version 1.10

Dear Cloaking Device user,

We are pleased that you have decided to take a look at TommySoftware® Cloaking Device. As you will see, it is well worthwhile.

TommySoftware® Cloaking Device is an easy to use but yet efficient Internet tool for everyone who sends e-mails or files across the Internet or other e-mail services.

Installation

The installation process is different depending on the way you received TommySoftware® Cloaking Device. Please make sure to follow all steps carefully!

1. If you received TommySoftware® Cloaking Device on disk:

On these disks you can find TommySoftware® Cloaking Device in packed form. In order to install TommySoftware® Cloaking Device, start the Windows program INSTALL.EXE on the first disk.

2. If you downloaded TommySoftware® Cloaking Device from a BBS:

As you are reading this text, you have succeeded in unpacking the file TSC110E.ZIP. This archive contains all files you require. You should find at least the following files: INSTALL.EXE, INSTALL.WRI and some numbered files (about 20 files). In order to install TommySoftware® Cloaking Device, start the Windows program INSTALL.EXE now.

After the installation, you may delete the files stated above. But before, please give a copy of the archives to all your friends! Please make sure, however, that you give them all the installation files, and not a copy of the installed program. Without a proper installation, the program may not work properly on their computer.

Undo Installation

During installation of TommySoftware® Cloaking Device, some entries are made to the reigstry database. They are removed automatically, if TommySoftware® Cloaking Device is deinstalled using the **Undo Installation** command from the installation program**.**.

System Requirements

TommySoftware® Cloaking Device requires at least the following:
- Intel 80386 processor
- Microsoft Windows 95 or Windows NT 3.51 or higher
- The file system must support long filenames
- 8 MB RAM available to Windows (not including swap file)
- Graphics card and monitor capable of displaying 640×480 pixels and 16 colors.
- Mouse or other pointing device.
